CHART YOUR DESTINY

This book gives you instant tools to providing a Mayan-Galactic life chart for yourself or others.

It is based on the underlying cosmology and philosophy covered in Book 1 which deepens and broadens the palette of the artist interpreting the information. However, Book 2 has been designed as a stand-alone resource, so that it can be used effectively without reference to books 1 or 3.

While it is simple to use, the information is deep and potentially life-changing. Unlike Western Astrology, this cosmology does not tell you about your personality, which, to a large degree is set in stone. It tells you about who you are in essence and potential - at the soul level. This opens up unlimited possibilities for applying that essence and potential to become the greatest YOU that you can possibly become.

As life is a never-ending journey of unfoldment, there is always 'what's next...' This implies that whatever a life chart might mean to someone today, that same information applied months or years down the line, may have a deeper or even different meaning. For this reason it is also highly recommended that you always provide a reading to your subject for *this year* of their lives, within the greater reading. This is done easily by looking up the the day and month of birth, but instead of the year of birth look up the year he or she is in, that is, the year in which the very last birthday occurred,

As the one providing the reading you are at liberty to interpret the information in whatever way you choose. Yet as the cosmology goes to the very core of one's essence, it can provide a powerful peg or trigger for guidance, counselling, or life-coaching.

It is my sincere wish and aim, that life coaches will utilise this potent tool for deepening the work with their clients, and inspiring andempowering them to 'raising the game'.

The entire cosmology is based on the core, multifunctional template of the Tzolkin, The Mayan-Galactic 'super-code'.

Before referring the Tzolkin, here would probably be a good place to revisit the 13 Tones and 20 seals in pictorial layout, listing both ancient Mayan names and Dreamspell names for each (see overleaf: Table 11 and 12).

THE TZOLKIN

The Tzolkin format *Table 13* is the original layout of the 260 kin of the Mayan Sacred cycle.

Also known as the Harmonic Module, this is actually an encodement for the creation and evolution of all of life in our Milky Way Galaxy, and possibly beyond.

One could refer to it as 'operating system software' from the galactic centre. Installed in every star or sun within our galaxy, our own sun beams this Galactic Code to earth. Here, together with the genetic code, it regulates all of life, acting as a blueprint for the unfoldment of all of organic life and consciousness - from the sub-atomic and intangible, to the universal and unfathomable.

To submerge yourself in the wonder and power of this multifaceted template, you would do well to read The Mayan Factor and Earth Ascending, both by José Argüelles.

The Tzolkin was also used by the Cosmic Maya for calculations of 4th dimensional time. They could project hundreds of thousands of years into the past or future as easily as the Chinese use the abacus. It is also of course a calendar and has many other template functions.

The Tzolkin follows the same sequence as for the two cogs Book 1, *Image 4*, starting with '1 Dragon' and ending with '13 Sun'. Starting in the top left hand corner, the progression is downwards to the bottom of the first column (at 7 Sun), then to the top of the second column (8 Dragon) and so on through all the columns, left to right, ending with 13 Sun in the bottom right-hand corner. The 20 rows from top to bottom represent the 20 Seals in sequence, hence the Seal images down the left hand side.

To discover where your Galactic Signature is positioned in the Tzolkin, first find the row of your Seal. In that row from left to right will be all of the Tones from 1 to 13 although not in counting sequence - each is represented only once. The cell (box) which contains your Tone is your signature.

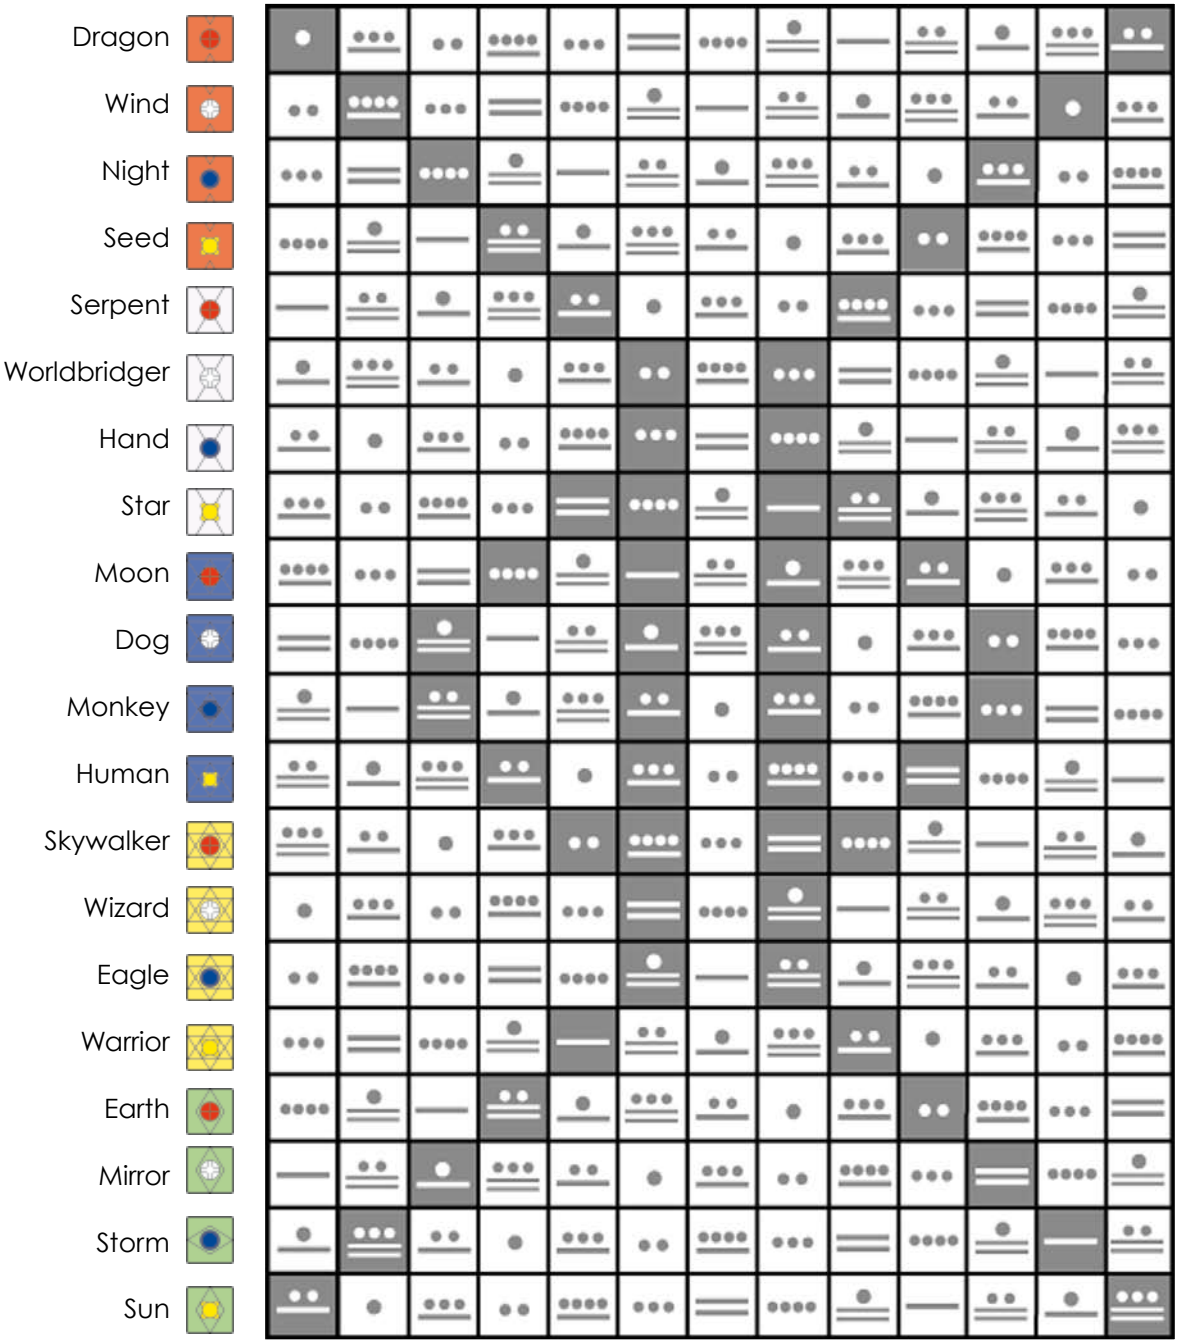
Galactic Activation Portals/Catalytic Choice Points

52 of the squares on the Tzolkin are Darker than the others and form a sort

of DNA pattern spanning the whole Tzolkin, from corner to corner. These days could be described as 'slip roads' onto a sort of 'super highway' – days that facilitate quantum leaps. They are referred to by José Argüelles as

TABLE 13: **THE LOOM OF THE MAYA**

TZOLKIN



Galactic activation portals. I have chosen to refer to them as 'Catalytic Choice Points'.

A Choice Point is a term in quantum physics, the new science. It was derived to describe phenomena, where there is no apparent link between the cause of an event, and its effect or outcome:
An event is observed to progress in a manner that is perfectly logical. It is then observed to be progressing towards a completely different outcome, often at a 'higher level' or different pace. While its new progress in itself may appear rational, the 'jump' between its first direction and its final outcome is completely inexplicable - by the old science at least. This is where the phrase "quantum leap" comes from. We can relate to this in a more down to earth way. We have heard of the phrase "being at the point of choice". This is the same thing. If, in a conducive moment we make a clear enough choice, with enough emotion behind it, it can change the course of our lives. This has probably happened many times in your life already! These conducive moments are also known as event horizons. When a powerful choice takes place on an event horizon, its like lighting the touch-paper - it can change the course of history, and has often done so. The Galactic Portal days - the Catalytic Choice Points - are such event horizons.

The Mystic Column

The central column has no dark squares at all. It's called the Mystic Column, and in some ways is like the spinal column running down the centre of the human body. The 'emptiness' in this column relates somewhat to the Zen notion of 'everything and nothing': In the nothingness, everything can take place - Only on a 'blank sheet' does the artist have infinite possibility for creation.

MAYAN GALACTIC SIGNATURE LOOK-UP INSTRUCTIONS

At the back of the book is an ephemeris or ready reckoner, with every date between 1900 and 2020. You can use this book as a form of Mayan Calendar where each day has an essence, opportunity and purpose - a gift that unfolds as you embrace the day's lesson – the 'soul of a day'.

The particular day of your birth is the blueprint for your life. The Tone and Seal of that day is the core of your personal Mayan sign or Galactic Signature. It is the soul of the day on which you were born, and carries your soul essence, purpose and potential for the whole of your life.

In her book "Hands of Light", Barbara Ann Brennan gives an insight into the incarnation process before conception. She shows that the soul, in meeting with its guides, chooses the precise environment it needs to deal with karma and to progress its journey. This includes not only the perfect parents for the job, but the specific fields of energy and consciousness that will give the greatest possibility for the soul to heal the past, complete in the present and unravel the future. Her book points to the work of Eva Pierrakos who claims that each of us takes on a "world task" or 'gift to the world' and a "personal task" or 'lesson'. Brennan states: "The design is so unique that by fulfilling the personal task, one becomes prepared to fulfil the world task. The personal task frees the soul by releasing energies which are then used for the world task."

The Galactic Signature echoes this. Your Tone relates to your life lesson or "personal task"; Your Wavespell defines your world task, and your Seal is who you are in potential, as you evolve through your personal role to fill your greater role. The soul chooses the day of birth that provides the required framework for life.

Let's look up two different dates - two interesting examples: Steven Spielberg born 18th December 1947 and; Princess Diana born 1st July 1961 (who, for ease of reference, will be referred to in the present tense). In many ways these two people are very different from each other. Of course their western astrology signs are poles apart. Yet if you look up their Mayan galactic signatures you will find they are the same Kin: 9 Storm! So what might be similar about them in terms of Mayan cosmology, that is not visited by western astrology?…

Look-up Procedure

- Go to the ephemeris at the end of this book. On the page for the year, find the month (left hand margin) and the date (top). Where date is, you will see a number between 1 and 260 (inclusive). That number is called a kin number and represents the changing daily energies referred to earlier in the book. Going back to Book *Images 3 and 4*, you could say it's where the two cogs of Tone and Seal meet. For both celebrities, it is kin number 139.

- You can now go directly to the 260 Galactic Prosperity Declarations in Book 3, for the 260 'Kin'. Here the Kin numbers are clearly marked. Go to the page relating to 'Kin 139'.
The first six phrases of the declaration gain meaning throughout the first few chapters of book 1.

- The seventh phrase relates to the Seal that guides you (see Guide Partner).

- One in five declarations will have an eighth phrase: If the day you're looking up falls on a darker square, this adds an extra dimension to the purpose of that day, or the life of the person you are looking up, and attracts an additional line to the declaration:

"I am a catalyst at the point of choice" or
"I am a galactic activation portal enter me"

Our celebrities don't fall on a dark square, but rather the middle column, the 'Mystic Column' (see Galactic Activation Portals and Mystic Column, above)

- You could also go directly to the 'Kin Tzolkin' schematic at the end of both Book 2 and Book 3. This is a template of the 260 kin or 'galactic signatures' in sequence. See The Tzolkin Table 13. Once you have located the cell containing the Kin number, you will notice that it also contains the Tone number for that Kin, and the Seal is listed down the left margin.

- In either case, above, you are now equipped to look up the relevant Tone page (see the chapter: Tones in Depth) and Seal page (Seals in Depth) for the days you have looked up, to find out more about the potential purpose, essence and 'gift' they have in prospect. For our celebrities these will be Page for 'Tone 9' and Seal page 'Storm'

- The section after the *Seals In Depth* pages is called 'The Life Enhancement Pattern' for that Seal. You will notice a number of key relationships referred to as "partners". These are guidelines to facilitate putting the most into, and getting the maximum out of, any day.

- You will notice that on the relationships page there are three specific relationships shown (in the east, west and south of the page), each governed by a particular Seal. These are described further on in this section as Support Partner , Sparring Partner and Discovery Partner. Yet in the 'north' position all five possible guides are listed, rather than just one. This is because all the other relationships are always the same, for each Seal, whereas the Guide Partner is not. The Guide Partner depends on the particular Tone or number (1-13) that relates to the Seal you're looking up.

- To find out the Guide Partner for any Tone and Seal, go to the chapter called: **Guide Partner Ready Reckoner,** *Table 14*.

- You will see that the nature of the Guide Partner adds a further phrase to the declaration page. See Guide Power Declaration...

- Another dimension is the nature of the entire 13-day sequence in which the day you are looking up falls. See Wavespell.

- You can find out the purpose and possibilities of any year in your life or the life of another. Simply look up the signature of the birthday that commences in the birth year you are interested in. You can then follow though all the Seal and Tone information to give you key pointers for the year you are looking up.

- To discover the nature of any year for the whole planet, look up the signature for 26th July for that year.

29th February…

If a person you are looking up was born on 29th February of any year, you need to determine the time of birth. Was he or she born closer to the midnight of 28th or 29th February? If the former, that persons date is taken as 28th February. If the latter, it should be taken as 1st March.

Dragon

"Consciousness is the ground of all being" *Amit Goswami PHD, What the Bleep do we know*

"In whatever world you make for yourself, you can keep embracing the new and the different over and over again." *Richard Branson, The Autobiography*

As a red seal you are Strong-hearted, a way of being that generates will power and fuels the initiator in you. This strength sustains your willingness to keep looking at the state of your life, the lives of those around you and the wider world. This way you can bring awareness to yourself and others about what is missing, and what it will take to restore and nurture a better quality of life. As Dragon you are the keeper of the memory bank of all that has ever happened, and all that is possible. Our purpose and potential which are both timeless and limitless, simply need to be re-awakened. Your special gift is that of intention, the birthing force of life. Your intention gives you the power to attract, embody and direct the primal life force energy of the universe. This keeps you and your projects nurtured and grounded in the pregnant moment of NOW. Harnessing this creative force for life, you step into your role as the 'earthing birther'. Midwife to the re-birth of yourself and others, you facilitate that life can be re-created in the moment, any time you choose, endlessly.

Wind

"The question is not whether I talk to to you, but whether you listen. I am talking to you all the time." Conversations with God

"The answer my friend is blowing in the wind" Bob Dylan

"In the esoteric Judaism of the Cabalah the Deep self is named the Neshemah from the root of shmhm, 'to hear or to listen': The Neshemah is She who listens, the soul who inspires or guides us". Starhawk

As a white seal you are open-hearted. This way of being makes you a clear channel for the giving and receiving of love, and a dependable messenger of truth. Being open, you are a gateway for Spirit to experience itself within and through humanity, and humanity to experience itself as spirit. Being 'in spirit', you are inspired. You represent the breath of life, purpose and potential, that God breathed into Man. As Wind you have the gift of showing people the power of their breath (?) to reconnect them with the memory of their purpose for being here, and their limitless potential. A receiver and transmitter of this message of re-awakening, you are a natural communication tower and portal. The message of Higher Truth you receive at any time, opens, clears and refines your life path, and the path of those you inspire. Rising to your calling breathes fresh breath into rediscovering who you are, and re-creating your life anew. Your gift of communication of Spirit, uplifts you and those whose lives you touch, preparing you for life's inevitable winds of change.

Night

"I shut my eyes in order to see." *Paul Gaugin*

"paint not by sight but by faith. Faith gives you sight." *Amos Ferguson*

.

"Searching for prosperity is like a fish swimming through all the oceans of the world looking for water." *Randy Gage Prosperity cassette series*

Being a blue seal, you are clear-hearted. This way of being creates an empty, womb-like space in which your dreams can be written, nurtured and ultimately birthed. Surrendering 'sweetly' to this creative dream state, you embrace your intuition as your primary guide. Your dreams bring you the memory of your profound purpose and potential. Your intuition guides you to choose and shape those aspects of your self and your life that will serve for the higher good. Only through complete commitment to your choice, will you re-awaken who you really are, and who you can possibly become. Releasing attachment to ego and logic, you move 'out of the way of yourself', removing all barriers to universal abundance and prosperity. Your surrender allows you to harness the powerful guidance of the 'dream time', to become your dream and vision for a changed reality. Equally, you can awaken in others the power of dreams to trigger memory, and the power of intuition to guide achievement. When you instil in others these secrets of prosperity, you become a gateway for the manifesation of Vision, you create a more abundant and prosperous world for all, and you take a quantum leap forward in your personal journey of transformation and growth.

Seed

"All that we are is the result of what we have thought." *Buddha*

"You need to claim the events of your life to make yourself yours."
Anne-Wilson Schaef

"The only difference between those who live in the magic of life and those who don't, is that people who live in the magic of life have habituated ways of being."
Marci Shimoff, The Secret

As a yellow seal you are whole-hearted. This way of being is the fullness of the cup that 'runneth over' and the flower that bursts into bloom - Free to blossom, free to grow and free to be alive. As Seed, you hold the DNA blueprint, the memory of the unfoldment of all aspects of life, from genetic evolution through to the unfolding of our higher purpose and potential. Your freedom to flower re-awakens the memory of Creation, and therefore the memory of your creation. In this infinitely fertile garden of life you are free to re-create yourself and your life as you please, purely by choosing. Every idea you've reaped is an idea that you've sown based on your past thoughts and ideas. Yet an idea is just a pattern of perception which can be changed. Recognition that you have chosen and created your present life experience exactly as it is, is what keeps you free to choose again. Being both sower and reaper puts you at cause in your life. Ownership of your universe frees you to create a new life for yourself, and a world in which all can flourish in their purpose and potential.

Serpent

"...play, play, play with sex - and with all of life!
Mix what you call the sacred with the sacrilegious, for until you see your altars as the ultimate place for love, and your bedrooms as the ultimate place for worship, you see nothing at all... Mix what you call the profane and the profound - so you can see there is no difference , and experience All as One. Then when you continue to evolve, you will not see yourself as letting go of sex, but enjoying it at a higher level. for all of life is S.E.X. - Synergistic Energy eXchange."
Conversations with God by Neale Donald Walsh

"God bless the roots! Body and soul are one." *Theodore Roethke*

As a red seal you are Stronghearted - a way of being that gives you the willingness to take a stand on the choices you make in life. Your strength of resolve gives you the vitality to see your choices and projects through. Your vitality is nurtured and sustained when you dig deeply into your 'inner storehouse' to access the Source of your talent and power . These resources will ensure the rejuvenation of your self, the juices of success of your projects, and the re-creation of your life and world. Your strength of intention keeps you connected with Source. When you live life through your senses your instinct is sharpened and you become a sensual being. As a result you embody the life force energy of the universe. This connects and earths you in the moment of NOW while it energizes you, to initiate for the greater good. "Ideas leave not their source". Therefore as it is our creation 'package', sex must come from our Creator. It will therefore lead us back to our creator. Your connection to both the earth and the Universe puts you, as Serpent, in a unique position to connect the two through sexual energy directed with pure, clear and highest intent.

Worldbridger

"Life is full and overflowing with the new. But it is necessary to empty out the old to make room for the new to enter." *Eileen Caddy*

"One does not discover new lands without consenting to lose sight of the shore for a very long time." *Andre Gide*

As a white seal you are open-hearted, a way of being that facilitates your being a bridge. Your openness leaves the communication lines clear for messages to be sent and received without interference: Messages between all levels and dimensions of existence, between people and each other and between people and new opportunity. Your special gift is the overcoming of the fear of death, the one fear on which all other fear is based. At a deep level you know that who we really are is greater than we can imagine, and never dies. This aspect of ourselves clothes itself in different forms at different times, yet transcends all notions of space and time. When you know that death is not real then the fear of death disappears, and with it all other fear. This creates the space or vacuum for full and direct access to the one Source of all power and talent, reconnecting you and those whose lives you touch, with the fullness and fulfilment of life. Your calling is to clearly communicate to others the need to release all fear, be it in the form of attachment, resentment, jealousy or guilt, so they can become a clean slate in their own lives, on which a Higher Truth can be received, and new opportunity seized.

Hand

"Healing is the return to wholeness." *Deepak Chopra*

"Our growing reliance upon external information has gradually obscured a simple awareness that all of us have long possessed. Inherent in this awareness are all the tools that we need to genuinely enrich our health and the quality of our lives." *Alice Burmeister & Tom Monte, The Touch of Healing (...The Art of Jin Shin Jyustu)*

As a blue sign you are clear-hearted, a way of being that aligns you with the healing power of the universe and allows you to embrace it fully, for the benefit of yourself and others. As Hand you know that healing is the return to our natural state of wholeness, and true health occurs as we grow into our purpose or vision for life. Standing at the threshold of third dimensional reality, your hands tap into the quantum field of wholeness just beyond normal vision and grasp, becoming 'hands of light'. In this field of reality, healing, recovery and achievement defy all normal routes of received wisdom, sometimes being referred to as 'miraculous', 'freak-' or 'uncommon'. Accessing the Source of all power and wholeness, you access your power and talent to heal and restore, empower and accomplish. Your submersing into this wellspring of health and vibrancy is your commitment to reconnect with the power and wholeness of life. 'Dharma' a hindu notion, sums up the essence of hand: When you love your work, express your unique talents, and live life through the question, "How can I serve", then you experience wholeness - healing has taken place. As you benefit your fellow human and yourself, you become the tuning fork that reattunes and realigns, thus becoming your vision for positive change.

STAR

"All the arts we practice are apprenticeship. The big art is our life."
M.C. Richards

"The purpose of art is not a rarified, intellectual distillate - it is life, intensified, brilliant life." Alain Arias-Misson

"What lies behind us and what lies before us are tiny matters compared to what lies within us." Ralph Waldo Emerson

As a yellow seal you are whole-hearted. This way of being is the fullness of the unborn star ready to explode into light. Being free to access the Source of all light you are free to reconnect with the source of your own power & talent. Tapping this Power of Creation, you move beyond any desire for '15 minutes of fame' - to become the 'star' that you truly are. Dancing in the light, you begin dancing in 'delight' - artful and celestial, radiant in your beauty. Free and empowered, you can paint, sing or dance your way to re-creating yourself, and creating the life you choose. As you choose to see things differently and become responsible for your world as it is now, you shed new light on your power to create. Owning a changed pattern of perception allows enlightenment to ignite and elevate you to a new level of being . You then fulfil your role as the eighth seal, the role of the octave jump, the paradigm shift, the quantum leap. Dancing in the pure light of your power and talent you reach for the stars via the inner star of YOU.

Moon

"Miracles are everyone's right, but purification is necessary first"
A Course in Miracles, Principle 7

"And the selfsame well from which your laughter arises,
was oftentimes filled with your tears." *Kahlil Gibran, The Prophet*

"When in doubt, err on the side of compassion."
Conversations with God, N D Walsh

You are a Strong-hearted red sign. This way of being empowers you to become master of your emotions. Supering your emotions you come to strike the fine balance between will-power and flow - choosing and intending a new attitude and quality of life and then flowing with the experience that issues from your choice. Striking this balance, you are able to process and purify both your power and purpose. As you discover that 'power over' serves no earthly good, you release any need to control. Allowing this to dissolve gives it the space to resurface as empowerment of yourself and others. And as you come to know that sympathy and pity nourish no-one, you allow them to be washed clean to resurge as compassion, a potent emotion for transformation. Master of your sensibility, you become the mighty magnetiism that moves the tides, the flexible fluidity of their flow, and the light effervescence of the foam. Through intention you are integrated - the embodiment of life force energy of the Universe - Lightness, power and flow - as one.

Dog

"Love is the ultimate truth of the heart of creation." *Deepak Chopra*

"...The opposite of love is fear, but what is all embracing can have no opposite...Herein lies the peace of God." *A Course in Miracles*

As a white seal you are open-hearted, a way of being that allows you to wear your heart on your sleeve as a statement of your fearlessness and connectedness with all around you and with all of life. Open and loving, you have nothing to hide and everything to demonstrate. You are generous in giving and gracious in receiving, knowing that they are the same - By receiving, you allow others to love, which is giving. As love is for giving, it is forgiving. Love forgives by recognizing that in truth, there is nothing to forgive. All grievances arise from a lack of love in the beholder. Take a step up and you remember that there is only one of us out there - you-me-God-All-One. In which case if you feel any lack of love, it must be at or from a part of yourself. Effective processing of your life experiences will occur when illusion of separation disappears, and love declares itself to be: "All that Is". As Dog, this is the Higher Truth you continually receive from the Universe and share from the heart. As you communicate this oneness through the demonstration of forgiveness and love, you integrate all aspects of yourself you nurture your power and purpose of unconditional love.

Monkey

"I want you to know that there are no colours in the real world, there are no fragrances. There is no beauty and there is no ugliness - Out there, beyond the limits of our sensory apparatus is a radically ambiguous, ceaselessly flowing, 'quantum soup'." *Sir John Eccles, Neurophysiologist*

" We are like magicians. We turn that quantum soup into material reality through our interpretations." *Deepak Chopra*

As a blue seal your key way of being is clear-hearted. This puts you in the most effective space for surrendering without fear, judgement or attachment, only with trust, to the process of life. In this playground without boundaries, your magical inner child can embrace the awe, wonderment and fun of the universe. Owning both your purpose and your power, sweet surrender to life's dance is your key you to processing and clarifying both. True acceptance of the universe as your guide means full commitment to the way/path it reveals to you, to follow your purpose and embrace your power. This integration makes you a formidable force for change. At one level Monkey represents mastery of the subconscious mind - The aspect of your mind that cannot distinguish between reality and illusion, truth and fiction, fact and fantasy. By being your vision for change (regardless of the perceived reality at the time), your conscious mind believes you are there, and so you become and create it. Monkey knows that most of what appears real is illusion, and most of what constitutes greater reality, seems illusory, non-existent, or at best invisible. This is the cosmic joke, that allows you to laugh with life. and play life as a magical game.

Human

"In the new view Mathematics can give us something. It can give us the possibilities that all these movements in consciousness can assume. But It cannot give me the actual experience I'll be having in my consciousness. I choose that experience, and therefore I literally create my own reality. Quantum physics tells us this."
Amit Goswami PHD, What the Bleep do we know

"Until your community of beings knows about 'being in community', you will never experience Holy Communion, and cannot know Who I Am".
Conversations with God, Neale Donald Walsch (N.D.W.)

As a yellow seal you are whole-hearted - the repleteness of the cup that 'runneth over'. Living life from a 'full cup' is a self-fulfilling way of being! The more you give, the more you have to give! Free to give from your heart to the hearts of others, you are free to connect with all humanity and all of life. You rise to the calling of Human - to see yourself and others for who you really are - 'human beings', not 'human doings' or 'human havings', and to make a difference that you have lived. By wanting for - and giving to others what they truly want for themselves, you show unconditional giving and love. and you create community and kinship with life. Connecting with Creation, you connect with Divine Will. As Human you recognize that your will for you is God's will for you. You understand the responsibility that comes with freedom - to use your free will wisely and for the highest good. People sabotage the difference they could make by blaming circumstance and those around them. When you own your perception pattern and choose to change them when they no longer serve you, you can process your experience to create a better life and a better world.

Skywalker

"We live in a universe that has no beginning or ending in time and no outer edges in space." *Sir John Eccles*

"God must become an activity in our consciousness." *Joel S. Goldsmith*

As a red seal, you are Strong-hearted, a way of being that supports your willingness to awaken those who are asleep to their limitless potential. Skywalker expresses into the world the awareness that we are spiritual beings having human experiences rather than vice versa. Skywalker knows that we are microcosms of the macrocosm created in the image of our Creator - with the power to create. And that by expanding our horizons and our self-esteem we can express the deep human urge to grow into ever greater 'Universal Shoes'. At the same time, Skywalker has the gift of earthing Higher Consciousness so that it becomes accessible to all. This may be done through the teaching or sharing of principles, dynamics or laws of life. Thus it can be said that Skywalker stands at the threshold of two movements: The evolution of humanity, and the earthing of Spirit. Through our power of intention, be it in the form of affirmation, declaration or prayer, we initiate the connection between both thrusts. This allows us to experience and express that we are spirit in form and form inspired. Thus we embody the life force energy of the universe, and with it the recognition that heaven is within, and what we make of life on earth.

Wizard

"No longer conscious of my movement, I discovered a new unity with nature. I had found a new source of power and beauty, a source I never dreamed existed."
Roger Bannister on breaking the 4-minute-mile.

"Yet the timeless in you is aware of life's timelessness, and knows that yesterday is but today's memory and and tomorrow is today's dream. And that that which sings and contemplates in you is still dwelling within the bounds of that first moment which scattered the stars into space...
And is not time even as love is, undivided and paceless?"
Kahlil Gibran, The Prophet

As a white seal you are open-hearted, a way of being that keeps the path free and clear for Spirit to express itself through you. As the shaman you know that thought is energy, everything is in motion or vibration, and that time exists only in the present. You are able to change your own vibration by changing your thoughts, or through meditation, in the NOW. Refining your thoughts aligns you with the thoughts and vibration of Higher Mind, allowing you to see, hear and touch what is invisible, inaudable and intangible to most. Open to being a mouthpiece for Spirit you are open to inspire with charm. Communicating what you receive through your 'sixth sense', story telling, and other sharing of enchantment, you express your awareness of Higher Truth into the world. Equally, you express to others the power of thought to change vibration, experience, and matter, in the moment. As Wizard you express the alchemy of timelessness - that only in the NOW can you be 'out of your mind' and 'in spirit' or inspired - consciously in tune with your Higher Self. And by moving beyond time-bound awareness, you can expand your mind, your quality of life, and the awareness of the world.

Eagle

"Be the change you wish to see in the world" *Gandhi*

Imagination is everything. It is the preview of life's coming attractions.
Albert Einstein

"Just as the eye is designed to sense and interpret certain frequencies of light, and the ear other frequencies of sound, the human emotional realm is designed to sense and creatively interpret the motivational, life-bringing energies that radiate throughout the universe." Ken Carey, The Third Millennium

As a blue seal you are clear-hearted, a way of being that allows you to draw new vision into your life and embrace the creative process that will manifest that vision. As Eagle you are aware of your power of vision to create the inner and outer world you desire. By your example, you express into the world the courage to 'dream big' for yourself and humanity. You express the power of your 'mind's eye' to see the vision accomplished, and to hold that dream or vision in optimism. And you express the commitment to 'flying home with the goods'(making it happen). True commitment is sweet surrender to the choice you make and then the actioning of that choice. And to then become or grow into that vision. Eagle knows that commitment to your purpose, power, and process, is commitment to your vision being realised - your key to success guaranteed. Such is the power of vision - by expanding your path it expands your life, and you evolve. As Eagle's vision is always for the highest good of all, those whose lives you touch, evolve too.

WARRIOR

"The real trick to life is not to be in the know, but be in the mystery."
"Sell your cleverness and buy bewilderment". Jalal ud-Din Rumi

As a yellow sign you are whole-hearted, a way of being that comes from being at cause and at choice in your life. Warrior knows that 'being' leads to 'doing' leads to 'having'. Your choice to be happy, confident, free and courageous, unconditioned by your 'doing' or having', results in experiences in your life that match those ways of being. as Warrior you know you can be whatever, and however you want instantaneously, through choice. When you step into your power you take the attitude of 'choosing' your life experiences as they occur. This ownership of all of your experiences, both those you created consciously and unconsciously, moves you up a gear expanding your quality of life. Yet there is still another gear for Warrior: When you take on board the full power of your mind to create, you take responsibility for the condition of the world at large. As the Warrior of light you choose to create a different world by changing your pattern of perception. In answering this calling of your Higher Self you express your awareness into the world. Freed by your fearlessness, you step into your power and lead by example: Comfortable living in the mystery, your sword of light cuts to the chase finding answers where they are needed, opening up new mysteries; You speak the truth even when it is uncomfortable; Through the courage of your convictions, your quests find success, self-expression leads to mastery and you create 'the impossible' to be possible.

Earth

"Give a man a fish and he will eat for a day, teach him how to fish and he will eat for life." Anon

A red seal, you are Strong-hearted, a way of being that empowers self-sufficiency. Your strength of will is directed at creating a self-generating planet with inhabitants who can stand on their own two feet. As Earth, you are aware that we are all connected in the intricate web of life - to each other, to all life, to the planet and beyond. We cannot harm another or the earth without harming ourselves, and in sustaining another we sustain ourselves. As Earth, you subscribe to 'teaching others to fish rather than feeding them fish'. This intention for self-sufficiency is the foundation stone on which you evolve a greater awareness - that of interdependence. In a mix of teamwork, community and co-operation, you create win-win scenarios for all - not on a one-off basis but in a sustainable way.You strengthen the systems of others through questioning the fundimentals of the system. Through your guardianship and leadership, those whose lives you touch, experience themselves as one with each other, with our earth, unified in the greater tapestry of life, and connected with the Source of all. This way you embody the life force energy of the universe to become a self-generating and self-regulating, organic whole.

Mirror

"The observer is the spirit inside the four-layer bio-body suit.
It is the consciousness that's driving the vehicle."

"It always goes back to the same necessity:
Go deep enough and there is a bedrock of truth, however hard."
May Sarton

As a white seal you are open-hearted. As Mirror this way of being allows you to see yourself and others for who you truly are. Open to the highest truth and possibility about youself, you see it in everyone else, regardless of how they 'hold' or see themselves. As a natural mentor and coach, you hold up a two-level mirror to others. Usually through questioning, you invite them to see where they are now, yet also to see the limitlessness of who they could be. If they do not accept your invitation, you hold no judgement, yet continue to make the mirror available unconditionally and with love, so they can reflect. This is the degree of your selflessness. By communicating what is possible to people, yet answering to their communicated need, you empower them to evolve at the level of awareness that they are ready for. As enough people tune in to receive a Higher Truth, collective awareness will start to shift. Your role as Mirror, is to facilitate this raising of consciousness to the point where humanity acts naturally from love and compassion in a new synergy of life - also known as peace. You strengthen others through questioning their internal dialogue.

Storm

The one thing that never changes is that everything is always changing. Life is change. God is life. Therefore God is change." Neal Donald Walsch
"life is a series of moments - each one is at our disposal
waiting to be exploded." Anon

As a blue seal you are clear-hearted. This allows you to dissolve all attachment, and empty yourself of ego, as the thunder clouds empty themselves to clear the sky. Storm is often the breakdown that preceeds the breakthrough. By your full surrender you become one with the void, a vacuum in which the grandest version of your greatest vision can be realised. Committing to this vision, you embrace transformation - becoming who you truly are. At the purest essence of our Divinity we remain unchanged, and yet to reach that consciousness, there is nothing but change: Changing circumstances, thoughts, impulses of energy, motion and results. As Storm, you know that in the face of change we either move down or up. Storm generates upward movement, as leadership, transformation, and evolution. Leadership is steering change towards our goals and vision. Transformation comes from a positive, creative response to the changes that occur. At a higher level, Storm knows that the transformation of one impacts on all, just as individual droplets of rain unify as rivers and oceans, only to rise again as quenching rain clouds. As Storm you facilitate the awareness of oneness between all human 'droplets' in the ocean of life, and wholeness in the fulfilment of their grandest vision and return to Source. Teacher, trainer or coach, you are a catalyst for this evolution of consciousness, in this ever re-generating synthesis of life.

Sun

Be really whole - And all things will come to you. Lao Tzu
"He who knows others is wise. He who knows himself is enlightened." Lao Tzu

As a yellow seal, you are whole-hearted. You are free to be in your full power and therefore free to be whole - body, mind and soul. As Sun, you are the steward of the the codes and laws that govern life and the unfolding of consciousness. You know that anything that presents itself to you as less then the love, light and perfection of the Universe arises out of a perception of separation. As Sun you know you are free to choose again - Recognizing that there is no separation in Higher Mind, you can take personal responsibility for the state of your life and the world. When the experience of wholeness or unity is generated, you synthesise life. Owning your changed perception pattern, generates the experience of wholeness and oneness with Creative Source, synthesizing life. When you step fully into the role of Sun you create the freedom and conditions in which leadership can flourish in the world, thus evolving consciousness. As you create and sustain environments that generate security, confidence and a desire to grow, people can play 'evolving' as a light, fun, and joyous game. This is true leadership, known by some as enlightenment. Your calling is to be a teacher of teachers, a trainer of trainers, or a leader of leaders.

One

"The primary imagination I hold to be the Living Power"
Samuel Taylor Coleridge
"Creativity is... seeing something that doesn't exist already. You need to find out how you can bring it into being and that way be a playmate with God"
Michele Shea

As Tone 1, the way of being that most aligns you with your purpose in life, is to be one with Source. One with Source, you ARE Source. As you are created in the image and likeness of your Creator, you are created with the power to create and are thus co-Creator. With your life as a clean sheet, you as the author may create it however you choose. Implicit in co-Creatorship is that the underlying purpose of all things be for the highest good of all. Be clear about and consistently 'come from' or 'act out of' your purpose and vision. This is what causes spirit in you to be activated within you. Know that it greatly facilitates your being a powerful co-Creator when you live each goal or vision as though it has already come into being. For example clearly visualise, hear, feel, taste and smell the surroundings, atmosphere and results of the realisation of your vision. Be the person who would fulfil such a purpose or function. Hold up a light to others to be 'purpose-focussed'. A great gift you can give to others (while fulfilling your own highest purpose) is to help them be clear abour their purpose and to stay on track with it, in other words 'to be on purpose' in life. Yet there is nothing as credible as leadership by example. Alongside the utilising of your qualities, gifts, talent and skills, the key in life to your success and prosperity is to remember your purpose generally, yet more specifically to always stay clear about tuned in to your original purpose for doing anything, and for your purpose to be aligned with Higher Purpose

TWO

"There is the risk you cannot afford to take,
and there is the risk you cannot afford not to take." *Peter Drucker*
"It is not beacause things are difficult that we do not dare; It is because
we do not dare that things are difficult." *Seneca*
"Do not fear mistakes - there are none."*Miles Davis*
"What doesn't kill me makes me stronger". *Albert Camus*

As Tone 2, 'Being risking' is the way of being that will most facilitate growth through personal action: It is said "no pain - no gain", yet certainly, the lesson of tone 2 is that your growth will only be relative to your degree of risk. Committed to being risking you can be absolutely honest with where you are now and where you choose to 'be' or get to. Tone 2 is also about having the courage to be authentic - true to yourself and your vision at all costs. Part of your lesson is to create a healthy 'tension' between where you are now and your goals and dreams. Like stretching an elastic band from a hand held held further back to one out front, so the tension pulls you forward, yet without such a shock to your system that the elastic band 'snaps'. The elastic band - your path to achievement, remains stabilised yet flexible. Another aspect of living in alignment with Tone 2 is seeing the positive in every 'negative', or every challenge as a growing opportunity. This is another way of pulling the elastic forward. Again, when you're being like the elastic - stable yet flexible - you embrace challenge and the tension is the positive stress that grows you. By embracing it rather than resisting it, it dissolves as a threat, and becomes your climbing partner, giving you a rope up the mountain. When you freely confront, embrace and dance with your challenges, fears and limitations, you free up the energy that is locked up in fear and resistance. This generates life-force, pranha or chi energy supporting you to better yourself, evolve, and become the best YOU, you can possibly be, through what you do.

Three

"If you turn it over to the universe you will be surprised and dazzled by what is is delivered to you. This is where magic and miracles happen."
Dr. Joe Vitale

Your lesson and purpose in life is live through the power of directed feelings in order to serve for the higher good of all life. When you manage your energy, and run your emotions rather than your emotions running you, you are highly effective and your life works. You look inwards to receive guidance and outwards to give service. Being open, places you in a position to receive guidance without judgement, prejudice or attachment to your own previous views, including to guidance that comes in the form of 'feedback' from others and the 'universe' at large. Being responsible, you are willing and able to respond to the guidance you receive. When you are giving to your higher Self and to others, you become service- and solution- oriented. Your willingness to risk places you in a space of boldly following the guidance that comes from the 'quantum field' - the field of all possibilities even if it seems against the norm, against the current, against the grain or simply downright bizarre. It's the willingness to surrender to a Higher Voice with trust and without fear. This faith fortifies your living sentiently - through evoking your senses, your feelings and your heart. Being 'out of your mind' - the real block to lateral thinking and living - you can tap or create real, effective and sometimes exrtraordinary solutions from the quantum field of possibilities.

Four

"you cannot have a universe without mind entering into it...The mind is actually shaping the very thing that is being perceived"
Fred Alan Wolf Quantum Physicist
"What you visualize you materialize . If you you've been there in the mind, you'll go there in the body." *Dr. Denis Waitley Psychologist*

Your role, function and lesson in life is to have a clear context and measure for your intention. Focussed, grounded and disciplined is the way of being that most serves you to create your context and measure: Being focussed keeps you goal- or project-oriented, and targetted on your vision. Being grounded ensures that whatever you generate will be usable 'on the ground', and accessible to all. Being disciplined assists you to keep to your commitment and handle what's in front of you, and what needs to be done. A key principle of tone 4 is that thought always precedes manifestation and more specifically - thought creates. Therefore what you think, be it conscious or unconscious, will create results that mirror those thoughts. Being disciplined is critical to remaining on track with the thoughts you would like to bear fruit. The "context" is the complete set of circumstances, parameters and framework that will shape your intention, goals and dreams. Having a "measure" for your intention is to have defined it that clearly, that you will recognize when it has been achieved. "Measure" also relates to clear communication of the boundaries of operation. These may include values, rules, principles and priorities in all areas of life, confidentiality in relationships, and any other defining features of whatever it is you intend to create. When you define clearly what it is you want to create, you inform and focus your own mind, the minds of others, and higher mind, setting the universal wheels of manifestation in action to mould, fill and fulfil the blueprint.

Five

"What this power is I cannot say. All I know is that it exists."
Alexander Graham Bell
"Don't fool yourself - Fuel yourself" *Avner Ivor Kornblum, Author*

Your Life lesson, function and purpose is to command the universe in to action. You do so firstly by being resourceful. This serves you in a number of ways: Firstly, it means you tap or harness the Source of all. It also means are in touch with your own inner resources, the source of your re-inforcement and power. In addition, it facilitates you researching and finding the resources, tools and information you need. It also means that you turn resources and situations around, to your providence, that did not initially relate to you or serve you. By owning your power, you take a stand on it so it is not just a feeling, but a commitment to acting from the greatness and magnificence of who you are. This way you stand at the centre of your universe, aware of the power within you to create your life the way you choose. You access Spirit (The Universe, God, or Higher Mind), through declaring who you are and what it is you are in the process of achieving. Declaration is more powerful than affirmation because it is a statement of total conviction and power, about who you are. Spirit responds to declaration because it has total clarity, no doubt, true confidence and the fullness of passion. Spirit's response shows that you have literally commanded the Universe into action.

Six

If you're feeling good you're creating a future that is on track with what you're desiring, if you're feeling bad, you're creating a future that is off track with your desires." *Marci Shimoff Author, the Secret*
"It don't mean a thing if it aint got that swing" *Duke Ellington*

Your role, lesson and function is to create balance, and flow with the rhythm of the universe. There is a 'too much' and a 'too little' of everything. This is completely personal and subjective and your function is to find the point of balance of everything for you, and to encourage others to do so for themselves. When you are centred in yourself, and in spirit, nothing can throw you in any way. this is the middle path between one extreme and the other, the mid-point in the swing of a metronome or pendulum, and the space between in- and out-breaths. Being 'in order' yourself, you are well placed to flow with the order of life and the universe. In this place you can synchronize with the rhythm of your breath, of life, and of any project or task you put your attention to. When you become sufficiently conscious, you discover there is a rhythm to everything. Being in step with the rhythm of life keeps you focussed by balancing your mind, and healthy through balancing your biological system. When your organs, your organizing, and your organization embrace these rhythms, life-force is then channelled for optimum benefit to you and all involved: Your plans and projects become efficient and effective. With your inner and outer resources organized, your life comes to reflect the organic efficiency, effectiveness and order of The Universe itself.

SEVEN

"You have to recognize that even the material world around is nothing but possible movements of consciousness. I am chosing moment to moment to bring the actual event of experience into manifestation."
Amit Goswami PHD, Quantum Physicist
"I myself do nothing. The holy spirit accomplishes all through me."
William Blake
"When you have inspired thought you have to trust it
and you have to act on it. " *Jack Canfield, The Secret*

Your lesson function and purpose is to resonate at one with the Universe and thus be a channel for higher mind To be a clear channel you (need to) give and receive information and energy clearly The way of being that most serves you to give and receive is 'open' Being 'expansive' assists you to 'raise your game' raise your frequency or vibration and expand with a universe that is expanding Yet most powerful of all is to just BE SOURCE At Source you have the opportunity to re experience yourself as a microcosm of the macrocosm and as co Creator This re aligns you and reminds you of 'where you are coming from' and what you are here to do. An effective and powerful way to be a channel for the Universe is first to create physical, emotional and etheric/psychic space for yourself and then raise and re align your vibration and frequency to that of the Universe This may be done through quiet breath dance meditation or whatever it takes to 'move out of the way of yourself' The moment you move out of the way of yourself you remove the only barrier blocking/to the full awareness creativity and power of the universe As you re align with Universal Spirit your heart and senses become attuned allowing you to ground or earth your experience in your feelings Feelings re ignite and re inspire you driving you to stay connected with your goal purpose project vision or mission Where teamwork is involved your ignition and inspiration spills over into the team

Eight

"You want to choose your thoughts carefully and you want to have fun with this - because you are the masterpiece of your own life - you are the Michaelangelo of your own life - The David you are sculpting is you - and you do it with your thoughts."
Dr Joe Vitale, The Secret

"A discovery is said to be an accident meeting a prepared mind."
Albert Szent-Gyorgyi

"Above all things, to thine own self be true" *Shakespeare*

Your life lesson, purpose and function is to integrate and embrace all aspects of yourself, your projects, your life, and the world, in perfect harmony. As Tone 8 you are a 'harmoniser'. You are lateral, whole, diverse and multi-dimensional. Being acceptant of this truth (about yourself), allows it to manifest and be a reality in your life. When you live this truth, you 'walk your talk', and you are in integrity. You are the 'proof of the pudding'! - the undeniable evidence. As a model of wholeness, you subliminally impress upon, inform and re-activate the minds of those around you with the memory of wholeness. You give them a blueprint, or frame of reference assisting them to 'regroup' at all levels. 'Having it all together' internally, puts you in a very strong position to recognize when projects, goals and plans are 'all together' - cohesive, integrated, synthesized, synchronized, and in harmony. Universal Mind becomes clear that you are committed to what you say you wish to achieve and clear about what exactly that is, so it can provide the precise conditions in which to manifest through you. These are the conditions that fulfill your role as Tone 8 - the creation of the conditions of full readiness for movement into action.

Nine

"Pray, but move your feet too" *Sufi saying*

"When would NOW be the right time to do that" *James Arthur Ray, The Secret*

"If not now, when? If not you, who?" *The New Revelations, N.D.W.*

"you cannot cross the ocean by merely staring at the water." *Tagore*

"Take the first step in faith. You don't have to see the whole staircase. Just take the first step." *Dr Martin Luther King Junior*

When in tune with your function as Tone 9, there is no space or time to think about or talk about anything - there is only space and time to 'do about' (unless thinking or talking happen to be the core 'getting the job done' activities required at any given time). Your purpose and lesson in life is to manifest, shift, grow and evolve. You are best placed to fulfil all of these when you are 'moved' and pulsate spiritually, mentally, emotionally and physically. When you are creative, excited, passionate, committed, determined, urgent, connected and spontaneous, your way of being takes on two powerful and compatible aspects - NOWNESS and ACTION. In the essence of Tone 9, you engage spirit through action. Your creative action, for the highest good of all, puts you at one with the great Mover of all life and creation. As co-Creator with Source, you seize the moment and act upon, realise and accomplish your intention, goal, vision or project. Embracing the above states of being you are literally 'being in action', a fertile and powerful place from which to grow and evolve. For obvious reasons there is nothing more to be said about this which in fact could have been wrapped up in two words - NOW MOVE!!!

TEN

"God is glorified in the fruitage of our lives" *Joel S. Goldsmith*

Your life lesson and purpose is to acknowledge and recognise evidence of yourself as Creator. Your way 0f being that mosts serves you as Tone 10 is to be wholly committed, grateful, trusting, conscious of your perfection, and fully aware. This way of being attunes you to the 'grand design' of all things facilitating personal creation that is in sync with the grand design. Energy is never lost - it only changes form. When you complete from and through these ways of being, the life force energy of the universe is converted into visible or tangible results and form - a denser energy. Completion means bringing things to fruition or wholeness. On occasion this means removing an aspect of your life rather than 'adding' one. For example, sometimes it is actually necessary to end a debilitating relationship, be it with a person, habit, aspect or thing in order to create wholeness. Ideas leave not their source, so the result of your creation still carries the level and quality of intention that gave birth to the process. You are then able to manifest, produce and achieve in excellence. Your creation and completions become evidence of yourself as co-Creator, spirit in matter and heaven on earth.

Eleven

"The mind does not know letting go, The being does not know holding on." *Buddha*

Your lesson, purpose and function is to be free, clear and unattached. The ways of being that lead you there are:- vulnerable, loving, humble, forgiving and trusting. These assist you to release, let go, and surrender to your higher Self and to life. They also put you in the space and attitude where you can honour the privilege of your life, your own essence and potential, the essence and potential of all those around you, and the Source of all life. These ways of being allow you to dissolve any attachment you may have be it spiritually as dogma or fixed concepts about the Creator, mentally as judgement or preconception, emotionally as dependency, fear, guilt, envy, anger, grief or sentimentality, or physically as habits, addictions and artificial highs. Through release of all forms and levels of attachment you liberate your heart to fully express who you are, and you free your senses to enhance your experience of life. This leaves you free, clear and unattached, to be completely in the moment, ready for new creation, or the re-creation of yourself and your life.

"Until your community of beings knows about being in community ,
you will never experience Holy Communion , and cannot know Who I Am"
Conversations with God, Neale Donald Walsch

Your lesson, purpose or function in life is to bring the round table or the 'talking stone' circle together in a spirit of cooperation and clear communication - to share (give and receive) wisdom. And out of that wisdom to create the next step in your own growth path and the growth path of others. Tone 12 is giving, supportive and courageous. Giving in terms of really sharing who you are first, and what you know, observe and have learned after, for the greater good. Being supportive gives people the 'space' to make mistakes and to correct them, the space to share their journey and what it brings up for them, and the space to grow. Having the courage assists you to tell the truth, however painful for the growth of all. It allows you to give and receive honest 'feedback' where it is for the highest good of all concerned. Through sharing your life lessons, experiences and insights with focus, clarity, humility, accountability and responsibility (the ability to respond), people will identify with you. They will relate your lessons and insights to themselves, inspiring them to make changes, 'avoiding re-invention of the wheel' and allowing the opportunity of life breakthroughs without pain. In identifying with you, your thoughts, and your wisdom born of experience, people have the opportunity to re-experience that we really are all the same - that all minds are joined in the one collective mind.

"When a man takes one step towards God,
God takes more steps towards that man than there are sands
in the worlds of time." The Work of the Chariot

"Your purpose, lesson and function is to know and experience that you are Source. When you are joyous, enthusiastic, alive, abundant and at peace within and without, you are at one with Source. Enthusiasm comes from 'en thios' - in God. When you are 'being in God' - you may, for example, experience the river of abundance, the breath of aliveness, the eternal flame of joy or the "peace that passeth all understanding". Whatever it takes to transcend your physical world and connect with the highest aspect of who you are will lead you to fulfill your purpose. It may take meditation, being in nature, a ceremony or a party. What brings you back to the creative loving Source of all life, brings you Home! Tone 13 is not about doing or having, but 'being'. Although, when your doing comes from your 'beingness', as an honouring and expression of Creation, then you are 'being in action' - which is 'being'. When you celebrate spirit through being, you are connected to Source, and all that is. In this timeless time, and spaceless space, you are able to transcend into a 'higher' reality. Here you might 'bump into your Self' - and recognize that you are Source.

The Life-Enhancement Pattern

"Hold your vision, and handle what's in front of you"

The above is a powerful guideline for success in all areas of your life. The Life-Enhancement system will give you power and direction within this process. Like all sub-systems within Mayan cosmology, this pattern is complete within itself. It provides the entire spectrum of relationships or stimuli that will facilitate your having a 'full cup' in life, with nothing left out. The Guide, Support, Sparring and Discovery/Reveal partners will:
Keep your vision in line with your higher purpose; ensure you put the building blocks in place; give pointers to ease you through challenge or adversity; and ensure that you enjoy, discover and unfold through the journey to each vision you hold, and through the process of life.

To facilitate the process of doing a chart for someone, two celebrities have been used as an example in the Signature Lookup section. Hence the references that follow, in this part of the book. We discovered that both Princess Diana and Steven Spielberg were born on the same Mayan Kin day, giving them the same signature, 9 *Storm*. The Hand symbols provide a key to the graphic layout of the 20 life enhancement patterns.

Guide Partner (North)

The Guide Partner, in the north position of the Life-Enhancement Pattern is probably the most important relationship within a galactic signature. Your Guide Partner is the nature or essence of that which guides you in life. When you are off track regarding your life purpose, the expression of your magnificence, or the achievement of your goals, look to the nature and quality of your Guide Partner. If you are open and receptive to it, it will usher you back on track.

You will notice that on each of the Life Enhancement Pattern pages there are five possible Guide Partners. This is because the precise one for any Seal, is dependent on the Tone which accompanies that Seal. While the other relationships are always constant for every Seal, the guide relationships vary, based on a particular formula.

For example, My own signature is 9 Eagle, guided by Monkey. An aspect of Monkey is 'magical play'. When I first started running workshops on this material 12 years ago, they were too intellectual, and in a setting that was too formal. People were attracted to the cosmology, but frustrated by its seeming complexity. Workshops weren't taking off. I was frustrated and disheartened. I made a request and command to the universe for guidance, and things changed quite rapidly. I attracted a collaborator who showed me another way. She suggested that the workshops be run in a circle layout rather than classroom style. That immediately shifted the energy. She suggested that we make the workshops fun and personal by giving each person a blank 'passport' on which they could draw their own signatures, their declarations, and everything that related to them. A new fun and magic had come into the workshops. There was now a buzz. People were relating to the information and finding it simple, user-friendly, and exciting. In this instance the person I attracted wasn't the sign of 'Monkey', although she might well have been - the cosmology works that way too. But by invoking my own inner guidance I attracted the Monkey qualities of magical play, and fun. This facilitated a process for embracing the material. 'Process' and 'Embracing' are both aspects that also relate to 'Monkey'. This relationship is not reciprocal in the sense that what guides you (as a signature), is not necessarily guided by you. Yet it is still a partnership because receiving is a very powerful way to give. By receiving guidance, you let guidance to be given to you, allowing the giver to flower and grow.

As *Storm*, both celebrities have the same Support Partner, Sparring Partner and Discovery Partner as any other *Storm*. Yet because they are 9 *Storm*, they are guided by *Eagle*. *Eagle* is the notion of a collective global consciousness, and having the vision that could elevate the 'collective mind' of humanity. So *Eagle* would guide Spielberg or Diana to have a huge vision. It seems they were both receptive to this guidance. If they had been 5 storm, say, they would be guided by Hand instead. Whether you view your guide as being a person, a day or simply a force or energy, this partnership says:

"aim high enough; always keep your vision centred in 'win-win' scenarios and the greater good; and stay open to guidance and direction from your universe".

Support Partner (East)

This is the relationship of mutual support in life. Whatever is needed to move through change in life or to complete your projects, will be made available to you, if you are willing to collaborate with this partner. Whether in the form of a person, a day or simply the quality embodied by this sign in your chart it provides support for you to 'steer' change in your life, rather than resist it; To be at the helm in any given situation, rather than a helpless passenger. In the case of Stephen and Di, the Support Partner is sun, the bringing of light where there is darkness, the facilitation of enlightenment, and the re-generation of life. The Support partnership is a pragmatic relationship that says:

"let's cut to the chase. What will it take right now to turn things around, move forward, or bring things to completion. Lets get it done."

Sparring Partner (West)

This relationship grows you and strengthens you. It is not your opponent in life, but rather a sparring partner on your side, rooting for you - There for you to identify your vulnerability, not to hurt you. By showing you areas for development this relationship keeps you 'in shape' for life. By toying with your weakness it strengthens you. For our celebrities, the challenge is Moon, amongst other things, going with the flow, and being willing to integrate and process feelings of compassion in their own lives, and demonstrate it for the benefit of others and the greater community. Under all circumstances the dynamic of the partnership it says:

"what you resist persists. Yet what you accept and embrace, dissolves or transmutes. Water can be phenomenal in its power, yet it is fluid and yielding. If it cannot find a way through it will find a way around. Any unease or pain, at whatever level in your life, is your friend and partner. It shows you precisely where you need to be more loving or giving or joyous, in order to heal and move forward; It always gives you a pointer to the next step on your personal growth path." Sometimes it tells you: "It's now time to 'come to the edge', to

‘step into a bigger pair of shoes’ - to accept a greater role in life. Embrace the discomfort. Remember that your growth lies just beyond your comfort zone.”

Discovery Partner (South)

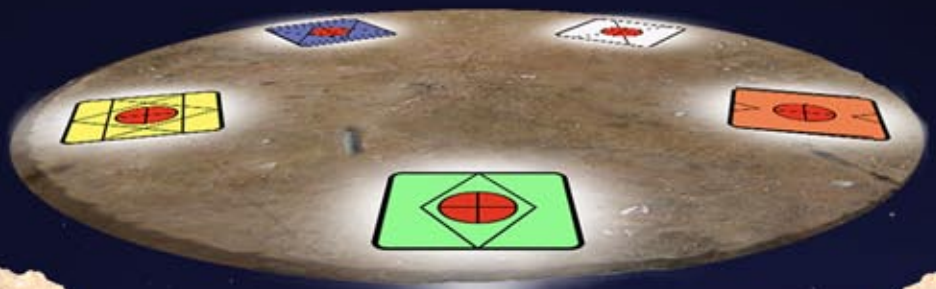
This mutual partnership leads to the discovery and revealing of one’s true self. It’s like a dance of life where both partners are equal, and where the whole is greater than the sum of its parts. A dance in which time stands still, and where, in the moment of NOW, new steps are chanced upon - new ways of seeing and being are happened upon. It’s the journey of serendipity and the journey that leads to the growth and flowering of self - a kind of “magical mystery tour”. The Discovery Partner for Spielberg and Lady Di is *Wind*: The communication of a ‘wake up call’. This relationship beckons you to:

“Open up to a higher truth, and remember you are a spiritual being having occasional physical experiences, rather than the other way around. Revel in life; Explore adventure and discover without holding back; See only possibilities and no limitations; Find peace in the questions, not the answers; Let your cup run over; Spread your wings and fly; Paint your true colours on the canvas of life, and shine your light.”

THE 20 LIFE ENHANCEMENT PATTERNS

The following pages provide a schematic for each of the 20 seals, with the key relationships for each one. Here it can be seen clearly that the relationships in the east, west and south are always the same for each seal, yet the north position - the Guide Partner - could be any one of five different seals. As mentioned earlier, The tone number (1-13) will determine precisely which of those five seals is the guide. You will also note that the internal colour - the actual colour - of each stylized seal in the north, is the same as the central seal, the one you are looking up.

As most of the information in the following pages came as direct guidance, in places they tend to follow a somewhat poetic form. This happened particularly in the south, where the relationship is often referred to as ‘a dance’.

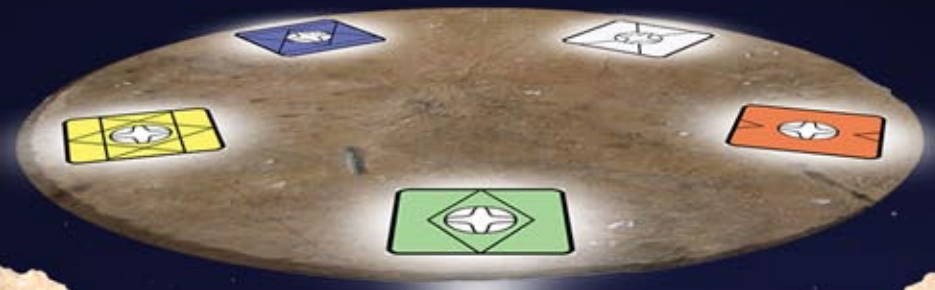


Your natural strength of purpose is challenged by Monkey to embrace laughter at yourself, and to play - with lightness and joy. Monkey reminds you that "the mind does not know letting go, and the being does not know holding on". Through embracing Monkey's call, you become a more effective nurturer of yourself, others and new creation. Your strength of intention becomes true initiation when you choose to see life as if anew - through the eyes of your inner child. Then, as natural initiator of new beginnings, you become the initiator of magical new beginnings.

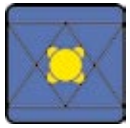
Your Dragon gift of nurturing yourself as you are NOW, is coupled with Mirror's gift of nurturing a vision or picture of the greatest 'you' you could possibly become. As Dragon you awaken the potential in yourself, and with Mirror's supportive feedback, you see the limitless potential in everyone and everything. The universe shows you honestly and objectively where you are right now - and that your 'Dragon tendency' towards a fresh start, and a new, greater, or deeper awakening, is never too late, is endlessly available, re-creatable and re-choosable, in the moment.

As Dragon you hold the memory of human potential. Sun brings to this memory the codes of life - the power and conditions for its unfolding. The seed of your new Self or creation germinates in the light of Sun. Dragon - personal purpose, dances in step with Sun - Higher purpose. Dragon, the nurturer of birth comes to know itself through Sun, the sustainer of life.

The alchemy between Dragon and Sun is that of the acorn and the oak; Being and becoming; Seed and womb; Individualized consciousness and unified consciousness; Both the source and ultimate Destination of the journey.

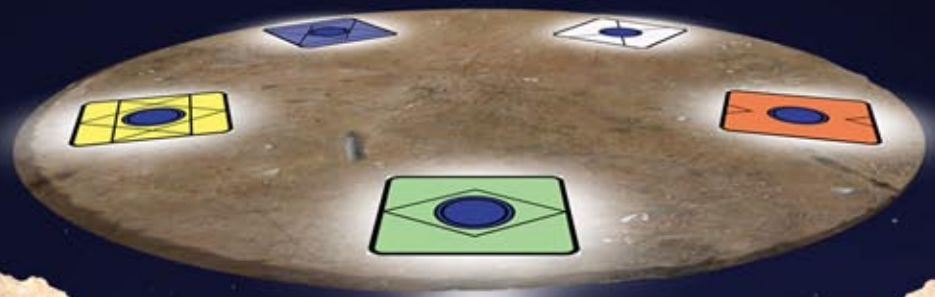


As Wind, the challenge to you being a pure channel for spirit is your own humanity or humanness. 'Human' challenges you to look at the part your free will plays in the free-flow of spirit through yourself and others. Human energy also challenges you to communicate responsibly and from the heart. When the message you give to others is a nurturing breeze rather than a gale or hurricane, It becomes a usable and clear force for positive change. Also, by embracing the cooperation of Human, yours is not a lone voice singing in the darkness, but a voice for collective awakening.



As Wind you are a messenger for Spirit. 'Earth' supports you to ground that message for the higher evolutionary good. Earth provides a common language or system for understanding, implementing and teaching your message. With Earth as your supportive teacher or coach, you are led to a greater level of self-sufficiency, self-generation and growth. Your inspiration – as Wind – takes form in usable and sustainable systems - for example free wind energy needs windmills on 'terra firma' to be of 'earthly good'! Earth supports you to evolve and globalise your message for change and growth.

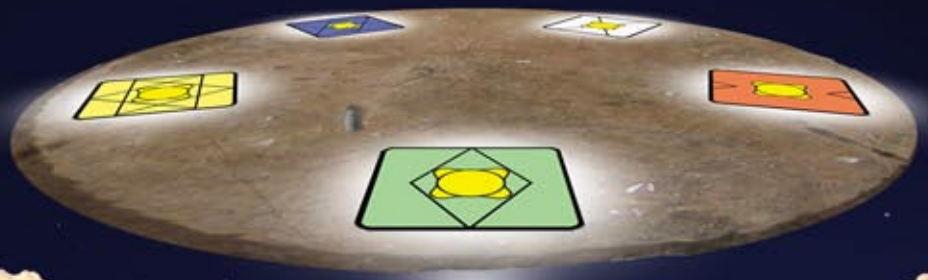
Wind - individualized spirit - comes to know itself and its purpose through Storm, the Universal Spirit that animates it. Wind is empowered by Storm as Communication is heightened, sharpened, tested and gets to know itself through change. Inspiring moments dance with defining moments, as the 'liver of the breath' dances with the Breather of Life. Your spiritual awakening meets real change - the regeneration of your Self. Personal Inspiration is channelled for collective transformation - as 'The Truth' becomes your Truth, and the truth for all.



As Night - the dreamer and explorer of inner space - Skywalker challenges you to expand your horizons, become more outwardly focussed and involve yourself in a wider world. This way the fulfilllment of your own dreams might at the same time be the fulfilllment of the dreams of others. Skywalker challenges you to embrace the river of abundance and manifestation for the higher good, reminding you that all things come from the one Source of all. When you trust your gift of intuition you allow heaven in, and give it an earthly vehicle through which it can create.

As Night, your gift is to awaken your dreams (and the dreams of others) so they can become a reality. Warrior supports you to realise your dreams by encouraging you to take risks and engage your 'freedom to express'. Warrior reminds you to strike your rock of the 'dream time' with the sword of bravery and give your dreams a 'cutting edge' that will move them from abundant potential to prosperous reality. Warrior encourages you to take a stand on your intuition and move from the 'realm of night' to become a 'knight of the realm!'

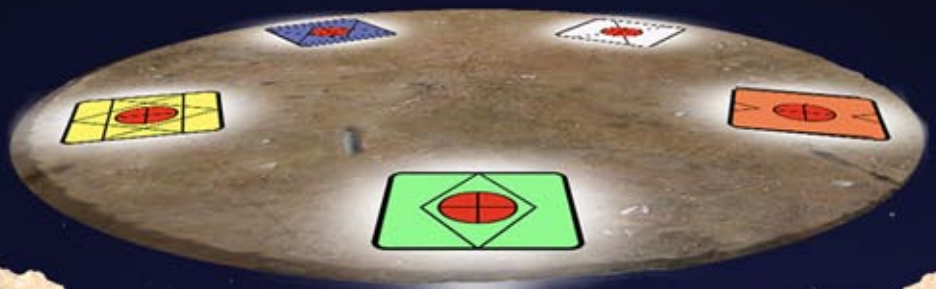
As night, your faith in the free-flow of substance connects with Mirror, the Laws that govern the flow. Mirror shows you that you are already prosperous, that outer prosperity reflects inner prosperity, that your prosperity is limitless, and it's who you are. Mirror invites you to 'dream big' and to use the endless, full, night sky as your guide.



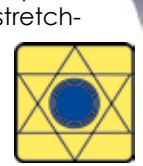
Wizard challenges you to change your patterns of perception, while in yourself remaining unchanged. As project- or goal-oriented Seed, Wizard challenges you to 'be', in the timeless, ever unfolding NOW. Only in this moment can your personal intention link with higher intent, and the journey to the ripening of your potential become a celebration of the unfolding of life. When you surrender to Wizard's call to 'stop and smell the roses' then Seed's quest for success becomes an enchanted blossoming, alchemyleads to germination and Universal Truth bear fruit in all that you are and all that you do.

As Seed you are the germinator of new ideas and changed patterns of perception. Eagle supports you to hold a longer term vision, while retaining your gift of being project- and goal-oriented. Eagle's drawing power pulls you skyward and transports you to embrace a vision of the greater collective good. Eagle supports you as the 'seed of your new self' to take a 'bird's eye view' of your life. Eagle gives 'Wings' to your ideas and reminds you to spread the seeds of change over a wider area, to harvest an ever greater difference in your life and in the world.

Seed, a fresh idea or pattern connects with Earth, a sustaining and sustainable system through which it can flourish. The seed of a new start NOW, knows itself through the timelessness of mother earth. Ideas take root in fertile ground. New attitudes form out of a new ground of being. Seed, the essence of positive culture change, manifests through Earth, a change in the basis, foundation and system of the culture. Targeted growth flourishes through synchronicity - being in the right place at the right time for right action.



Your tendency as Serpent is to regard as true and real what what your senses can verify. Your gift is to handle what is directly in front of you. Eagle challenges you to recognize that your perception shapes your reality and stretches you to embrace a wider vision for personal and global change and growth, and to make that your new reality. Your willingness to access your inner storehouse of potential, power and vitality is challenged by Eagle to take wing and be channelled as usable energy for postive change for the higher collective good.



As Serpent you are the energy, life force, 'chi', or 'pranha' of the universe. Wizard reminds you that this can only be accessed and utilised in the moment of NOW. The eternal youth of Serpent is only available when you move out of time-bound awareness into the timelessness of Wizard. Wizard supports you to bring charm into your life and chemistry into your relationships. With the support of the enchanting 'snake-charmer', sexuality becomes sensuality, as you are reminded to express your vitality as a dance of life - with life, and through life.

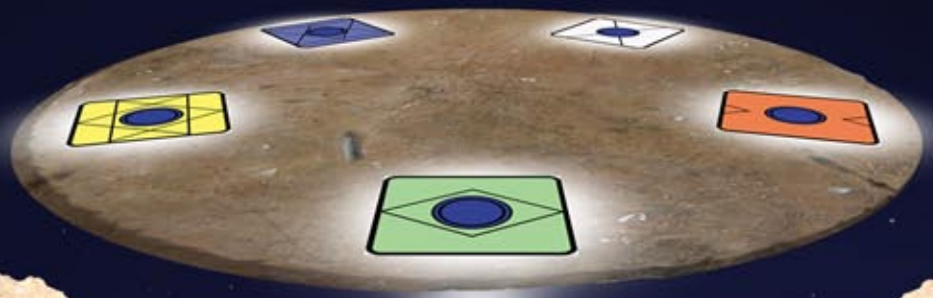
The vitality and energy of Serpent is channelled by Warrior into a path and a quest. Energy meets bravery, creating the power to overcome all odds. Instinct dances with intelligence. Vitality finds self-expression as life force discovers a life path. Passion finds direction and a mission. Power meets with courage and confidence.

The kundalini energy of Serpent is activated and finds an outlet and freedom of self-expression. Universal life force dances with Universal intelligence.

Your gift of cutting with the past, leaves you a clean sheet of future promise. Warrior challenges you to overcome the fear of death, the root of all fear. Through Warrior you seize the moment fearlessly and choose it as a path with a heart. Warrior reminds you through risking and courage you can become a champion of life's opportunities. Also, while Worldbridger has gift of forgiveness, Warrior challenges you to speak your mind with honesty and courage where required. While releasing your differences with others, you are challenged to maintain your uniqueness.

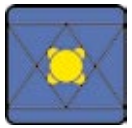
The vacuum you create by releasing the past, creates the space for heaven to fill your life. This limitless space for creation becomes an open stage for a future without bounds to unfold into your present. The blank sheet of World-bridger becomes the empty papyrus sheet or pyramid wall awaiting a 'download', revelation or prophesy from Skywalker, the messenger and scribe. Worldbridger creates the space for, and invites Creation to express itself.

Your essence of 'releaser of the past', open mindedness and innocence, dance with Eagle, the pull to have a bright, creative future painted on the space you create. Deciding what you don't want meets choosing what you do. The blank canvas finds the painter of a new vision. The vacuum you create is fulfilled through the creation of a better world. Forgiveness of the past dances with embracing of the future, the clearer of the decks with the raiser of the game, equality of opportunity with the creative power to make the most of it. An empty sheet becomes a life rich in what you envisage and invoke.

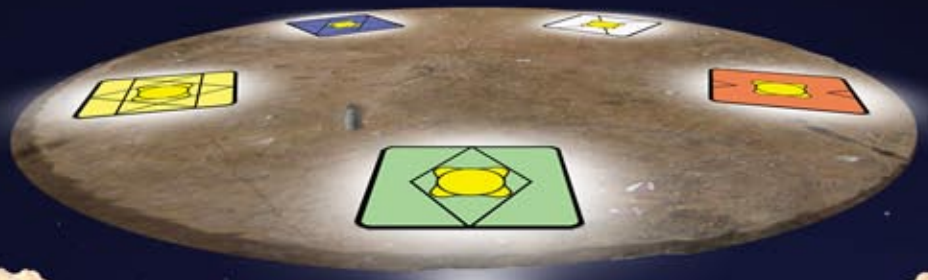


Earth challenges you to generate self-sufficiency by facilitating self-healing. 'Teaching to fish' rather than 'giving fish' ensures that healing is ongoing and permanent. Earth challenges you to show people that both a lack of wholeness and the source of wholeness lie within. Earth also reminds you that your purpose for healing, restoring and rebuilding is ultimately to create a better world, for we are all connected. When you give people the tools to access their inner power, you are a true healer.

As Hand, your gift is to access the power of the universe to facilitate a changed experience for youself and others. 'Human' energy is there to remind you that this power always be used for the highest good of all life. Your accessing of the restorative, healing, teaching power of the universe, is made learnable and transferable by Human. Human supports you to use your free will with wisdom, to extend a hand of brotherhood, and give others a 'hand up'. Human reminds you to integrate your gifts into the wider community, so it can make a real difference.



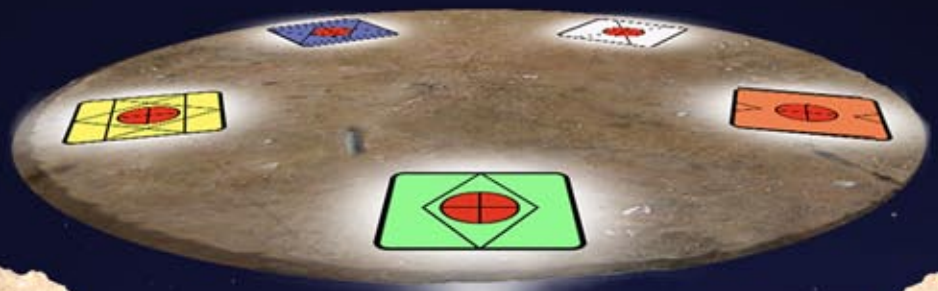
The power of healing dances with power of NOW. Through Wizard's shamanic enchantment, recovery becomes magical recovery, healing becomes quantum healing. Application of wholeness is fuelled by the alchemy of wholeness, the 'tap' by the source, healing by truth, and patience by timelessness. When Hand embraces the 'wand' of Wizard, healing hands become terminals, through which a higher spark of Truth and Light can pass. Hand enchanted by Wizard is the sweet surrender to the full flow of Source, and a force for truth beyond your own thought and action. The dance of Hand and Wizard is the dance of Wholeness within holiness,



As Star you have the gift of seeing beauty in all things, for that is their essential nature. Mirror challenges you to see beauty in yourself, and to be the best YOU, you can possibly be. When you surrender to the honesty and the self-observation that Mirror holds up to you, you become self-aware and spiritually responsible. You can then see the outer universe as your guide and sounding board for what is going on within you. And can dig more deeply into your limitless power, talent and beauty and be a 'star'!

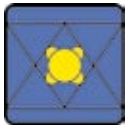
The shining star of your inner potential is led to a new level of joy by Monkey, your inner child. Monkey reminds you of the truth behind all illusion - that there is no separation from each other or from Source. When you surrender to the process of life you are free to access Creative Source, resulting in creative flow and joy in your life. This way Monkey supports you to see the beauty in everything and for your art to be a statement of the magical power we all have, to reach into the future and paint the experiences we choose.

Your talent finds expression and is raised to a new level. Artful living becomes win-win living as your art transports people to a new level of awareness. When your beauty is expressed as art, you truly shine. The union between Star and Skywalker is the union of proportion with perspective, stardom with principle, aesthetics with altruism, star-gazing with star-seeding and art with its exhibition. As Star connects with Skywalker, stars connect with space, talent accesses awareness, the beauty in you touches the beauty in all, and starlight meets stardust. When you allow heaven to shine through *you*, all of heaven is allowed to shine.



As Moon your ability to be flexible yet grounded, is tested by Storm who challenges you to remain in the flow of life, in the face of change. When you embrace change with grace, poise and compassion, you become a powerful channel for wider change. By its tempestuous presence, the storm of change can overflow the banks of 'moon river' and muddy its waters. This way Storm reminds you that only through unsettlement and discomfort can you grow, and only when you change at the level of 'being' first, will you have a transformed experience of life.

As Moon your gift is flexibility and flow. You are supported by Dog to fill the flow and process of life with the river of love, that springs from the heart. Your sentience, feeling, and tears of purity, swell to become empathy, compassion and tears of love and joy. Sentience is expanded by love, to touch the lives of others. Your willingness to flow with life is communicated with self-respect, dignity and love. Your feelings remain light so that your experience can be integrated and processed. Your deep sensitivity is kept pure through unconditional love.

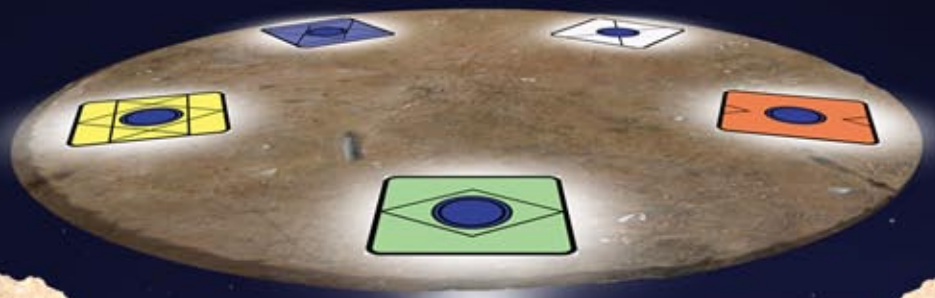


The Moon re-experiences its value as its cycles dance with the cycles of human fertility. And Moon dances with Human as its rhythms attract gatherings and ceremony - in celebration of life. Your union with Human is the union of flexibility with wisdom, compassion with community, free-flow with free-will, and purity of heart with freedom of spirit. As you embrace the gifts of Human, your 'waxing and waning' comes through receiving and giving, your 'newness' through freedom of choice, and your 'fullness', through sisterhood and brotherhood.

Your gift is unconditional and heartfelt love. Sun challenges that love to be with lightness, self-awareness and focus. Sun's rays through a magnifying glass show what the power of focus can do. When you embrace the power of Sun you channel your power of love in a way that can ignite, uplift and heal the hearts, minds and lives of others. The love you have for certain 'special' people in your life becomes the love that sees the specialness in all people. As Dog in union with Sun, the creative, generative force of the universe – the Creative Source of all - loves through you.

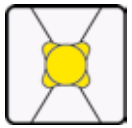
As Dog you are the essence of love. With the support of Moon, your love becomes a river that flows to all and through all; Love that ebbs and flows like the tides, becomes a love that flows steadily, like an eternal spring. Love that is all around becomes channelled and purposeful. The love that animates the universe finds expression through sensitivity and empathy. Through the emotional flexibility and physical purification of Moon, your heart – the source of your personal experience of love - remains young, healthy and strong.

You come to know yourself through Monkey as the heart comes to know sweet surrender, and love of the world embraces love of yourself and your magical inner child. Monkey brings intimacy, mischief, play and magic to your love. The truth beyond illusion dances with the love beyond all fear; Dedication dances with abandon, joy with sincerity, and the love that touches hearts and souls, becomes the magical love that moves mountains.

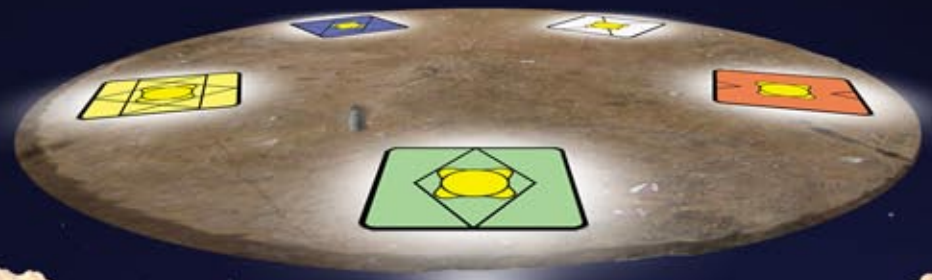


In Monkey's 'playground of life' Dragon points to the magical flight of a kite, proclaiming: "you can 'be the free and joyous kite' only if you are also the one holding the string, rooted to the earth." This way, Dragon challenges you to embrace the magic of all things while remaining practical and earthy – to be "in this world", without having to be "of it". Surrendering to Dragon earths your vision in reality, as a tangible demonstration of the magic of life. Dragon reminds you that when your creations are effective, your soul is nurtured.

Your knowingness of the true nature of illusion and reality – that they are usually reversed in this world – becomes a notion accessible to others through art forms. Monkey, your magical inner child, is touched by Star, the memory of your pristine beauty and the inherent beauty in all of life. Play continues to be creative – with brilliance - as Star reminds you of your freedom and ease with which you can access the creative universe. This way, the magic of life is ignited within you by the radiance, confidence, beauty and flair of Star.

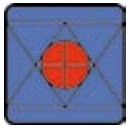


The dance with Dog is the softening, lightening, and refining of the maverick Monkey. Dog's love keeps your trust honoured, your surrender 'sweet', and your embracing of life's process fuelled by the Source of all good. As Monkey you reveal myth and illusion for what it is, yet The love and truth of Dog keps this exposure centred in love and for the highest good of all. Openness allows all to access the hidden magic and mysteries of life Through Communication life's magic remains demonstrable. Sharing of the 'cosmic joke' remains heart-centred. Dog's loyalty and dedication sustain and nurture your message and vision of hope.

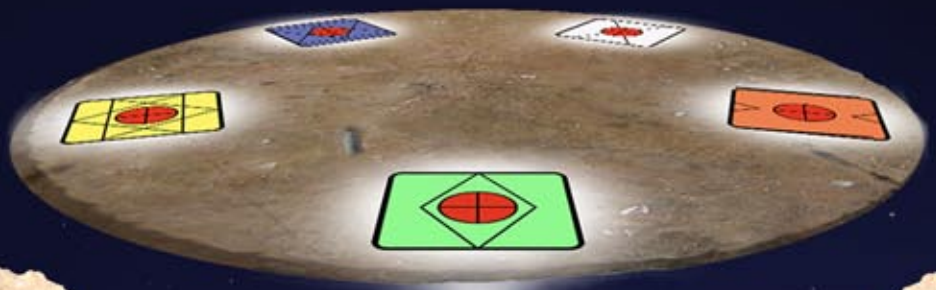


Wind challenges you to exercise free will within a reverence for spirit and awareness of a higher will. Wind essence reminds Human that you are not just of the flesh, but are animated by an immortal Spirit - that breathed life into you, and continues to breathe through you. When you embrace Wind and bend with it as does the willow, you receive the humility, courage, empathy and inspiration required to connect with others honestly, openly, clearly, and with love. When communication is put back into community, teams, groups and societies flourish. Human networks become networks for Spirit.

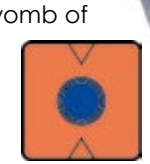
The gift of Skywalker is to improve and expand yourself and bring higher principles and a new paradigm into the affairs of yourself and others. World-bridger encourages you to release judgement, forgive the past, and be unattached to the future. 'Burning' these 'bridges of illusion' brings you into the NOW, the only place and time, the endless moment to be seized, where you can become a bridge for truth, and a vacuum that draws in a future of promise and possibility - a 'quantum bridge' for the creation of heaven on earth.



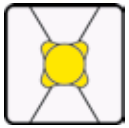
Human discovers itself through Moon as the wisdom of the rock meets the youthful flexibility of the river. Ownership and accountability for your experience meet with the free flow of process. Community finds heartconnection. Freedom of choice finds freedom of flow, humanity joins with the cycles of the moon, unity of heart meets with purity of soul, as the surfers of life dance with the rhythm of the tides.



Night challenges you to go within - to the place where dreams germinate - rather than seeking out possible castles in the air. It reminds you that the journey self-actualization starts inwardly first. Surrender to Night's womb of progressive unfoldment, and Night's message of trust in abundance. You might then 'walk the skies' for inspiration and upliftment, yet you will build castles on terra firma. Then, Skywalker's natural tendency to reach out and find heaven becomes the personal and practical experience that it lies within us.



The gift of Skywalker is to improve and expand yourself and bring higher principles and a new paradigm into the affairs of yourself and others. World-bridger encourages you to release judgement, forgive the past, and be unattached to the future. 'Burning' these 'bridges of illusion' brings you into the NOW, the only place and time, the endless moment to be seized, where you can become a bridge for truth, and a vacuum that draws in a future of promise and possibility - a 'quantum bridge' for the creation of heaven on earth.



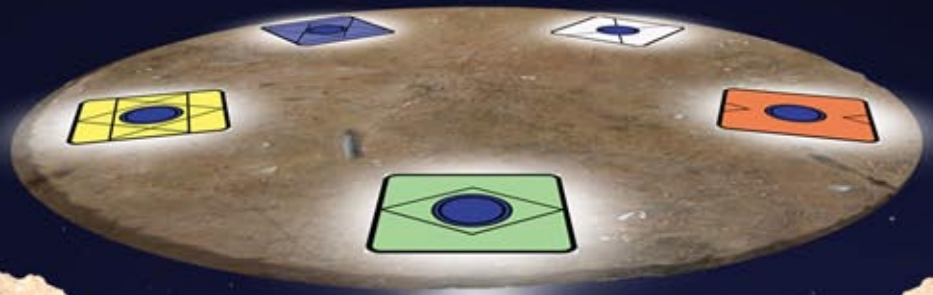
The collective Awareness of Skywalker comes to know itself through individualized awareness of Star. Creation finds creativity, as a heavenly message finds a heavenly messenger. Perspective meets proportion, as universal boundlessness finds unified form. Mind discovers itself through matter.

Heaven is seen as the beauty in everything. Expression dances with creation. The path to self-awareness is lit up. The octave of transcendence meets the octave of form.

Wizard's inclination to inspire and exhilarate is challenged by Seed to find a methodical process for channeling that inspiration into tangible form. Seed challenges you to weave your anecdotes with a common thread, moral or pattern so they can become a source for learning and upliftment. Seed reminds you that the nature and value of any intention can only be measured by the result. When you surrender to the focus, plans, strategy and goal-centredness provided by seed then your wand of enchantment becomes a sharpened tool for positive change.

As Wizard you are the expression of the 'Nowness' of the Creator, that only exists beyond 'time-bound awareness'. Serpent supports you to earth and utilise this 'beingness' for powerful and practical use, by reminding you to stay connected, and to be a user-friendly resource. Serpent shows that a true sorcerer must be grounded in Source! Serpent reminds you that you can only remain in the Now by being in your body, and living through your senses. This will energise your message and your projects, and keep you young, vital and empowered.

Alchemy – the potion - requires the healer and dispenser. Inspiration, animation and revelation requires a vehicle for it's expression and accomplishment. Inspiration marries with learning and is channelled into achievement. The truth you receive can be channelled for the higher good, and the wand of magic that you are, is held in a hand of intention. The flash of brilliance is conducted, and the potion and alchemy of life, comes to know itself through the healer and restorer of life. The story finds a scribe so that wisdom can lead to transformation.

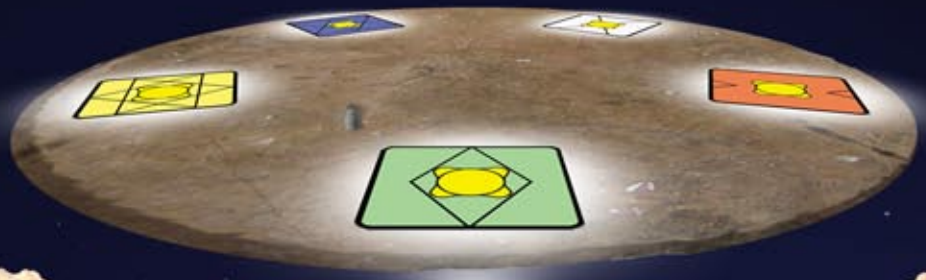


While holding and growing into your vision as Eagle, Serpent challenges you to handle what's in front of you, live through your senses and be grounded in your physical body. And that your greater vision for humanity needs to be grounded in practical reality so it is workable, and makes a real difference 'on the ground'. As Eagle, attuned to the collective mind, Serpent challenges you to reconnect with collective feelings. Vision becomes a healthy balance between mind and instinct. Serpent reminds you to nurture your vital life force energy so it can be channeled to create your vision.

As the visionary of a better world, you are supported by Seed to begin change with a new pattern of perception - at grass roots level. Seed brings the quality of focused awareness, encouraging you to find a pattern or framework in which your vision stays alive and flourishing. Seed energy facilitates your creation by reminding you to break the longer term picture into 'cellular' building blocks, so it can be progressively realized. Seed also reminds Eagle that change needs to start 'in one's own back yard' before it can be applied globally.

Your vision of a new, uplifting, expanding future meets with the space, gap and opportunity for its expression. Worldbridger provides the creative visionary with an inspiring clean sheet: Materially, by 'deleting' and clutter clearing; Emotionally through 'cutting ties' and forgiveness; Mentally in releasing judgement and attachment to ideas, and spiritually through meditation.

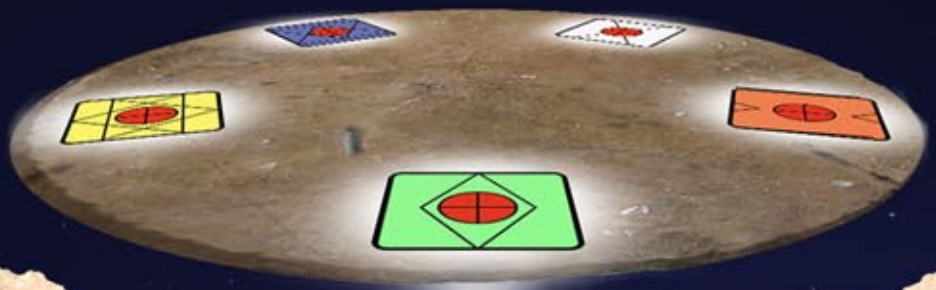
On this sheet can be painted the grandest vision for your goals, your dreams, your life and your world. Creation knows itself through opportunity, and open eyes become windows to an open mind, ushering in a new world.



Your Warrior drive to hew a new path is challenged by Worldbridger to ensure you have first truly cut with all paths leading to the past. Worldbridger challenges your natural gift – your sword of fearlessness and bravery - to be imbued with the soft edge of forgiveness and innocence, poise and balance. It can then be a shaft of light in the darkness that reclaims equality of opportunity where there is none, and rekindles hope where there is despair. Worldbridger reminds you that only through transcending the fear of death, can you celebrate the fullness of life.

As warrior your gift is to blaze a trail ever onward and upward. Night supports you to go inward before you express outwardly. Night fuels you with faith and reminds you to awaken intuition and trust as your natural support system. When you engage the deep, calm support of Night then your expressiveness becomes that of your Higher Self. As Warrior you are master of your convictions and you lead by example – Night empowers you by giving you a dream to nurture and assists you to embrace success as prosperity on ALL levels, from material to spiritual.

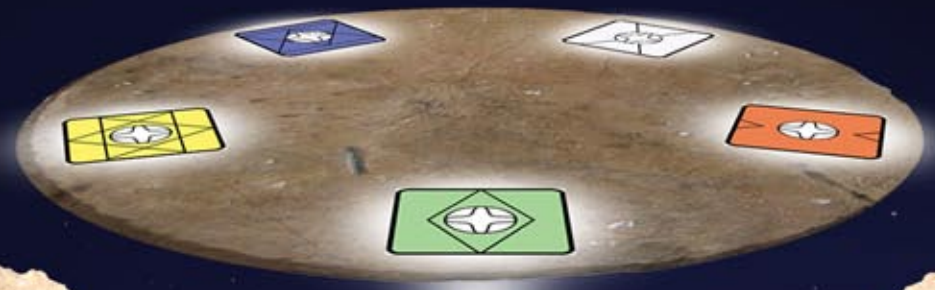
The Warrior of light connects with its source of power. Lofty ideals are grounded in an earthy cause. The quest for success, self-expression and mastery is fuelled by the vitality, energy and staying-power of Serpent. Intelligence is fuelled by instinct, Sense by the senses, Self-expression by passion, leadership by example, the impossible by possibility and 'the glory' by 'the power'. Courage of convictions is empowered by a sound and earthy basis for those convictions; Confidence is backed up by health and vigour; Warrior's quest for answers is fulfilled through serpent's quality of reading between the lines.



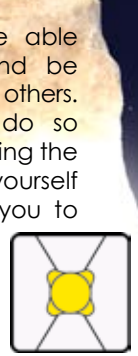
Hand strengthens you by challenging your drive for self-sufficiency to remain one of connectedness to all of life. By embracing Hand's challenge, sustainability becomes a source for healing, and independence becomes interdependance. Self-sufficiency for the greater good becomes a celebration of community and co-creatorship with the Divine. Embracing Hand's influence, you facilitate healing the past, restoring confidence, and enhancing knowledge, leadership and accomplishment. And Earth's organic evolution becomes spiritual too.

Your gift as Earth is to create fertile ground for the evolution of life and humanity. Wind supports you by constantly breathing new life into all of your projects. This ensures that expansion remains people-oriented and heart-centred, and independence becomes inter-dependence. Wind essence keeps you aware of Spirit, so that it remains the force that underpins all of your projects. Wind communicates your sustainable systems for teaching, living and growing so they can be shared, understood, and a source of inspiration for all.

Earth, the supporter of all life comes to know itself through Seed, the channel of new life. The calling to lead and teach is met by the desire to unfold and learn. The womb knows itself through the egg and seed of life. Willingness to regenerate dances with readiness to grow. Responsibility for your outer world embraces ownership of your inner world. The fertile field of possibility discovers itself through a focussed idea and probability. Synchronous evolution meets targeted growth. Raw potential unfolds into flower. Fertile ground of awareness ripens into Self-awareness.

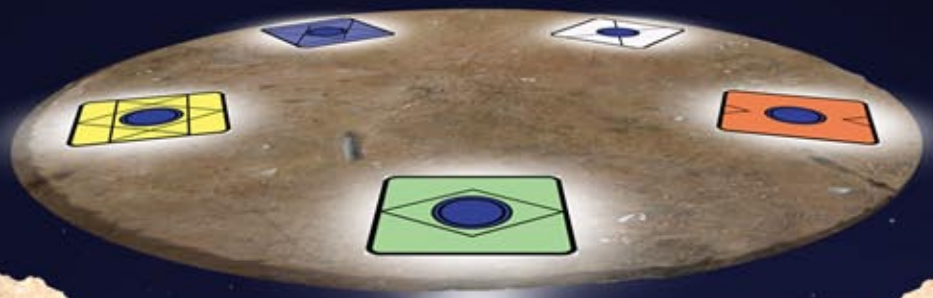


As Mirror you are able to cut to the chase and be honest with yourself and others. Star challenges you to do so while at the same time seeing the beauty and potential in yourself and others. Star reminds you to be pristine and without blemishes yourself, so you can be a true reflector of light and radiance. By surrendering to the artfulness of your shining inner star, Mirror ceases to glare and begins to truly shine. People can then look to you as a catalyst for learning to accept, respect and love themselves.

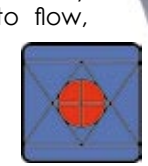


As Mirror, your gift of courageous, outspoken and clear feedback is so that the potential you see in everyone and everything can be attained. Dragon reminds you to remain aware of the tender inner being, so that honesty can be imparted with compassion and nurture. Dragon reminds you to nurture yourself, particularly your physical body, and to slow down. Mirror's drive to uphold a higher truth and generate a lasting peace, is supported by Dragon who causes you to look within first, where peace and healing begin.

Peace of Mirror is fuelled by faith of Night. Infinity dances with the finite; indefinable order with definable order, expansion into spirit with contraction into form. In meeting Night, you find a channel through which you can direct, find form and know yourself organically. Light finds expression through darkness, just as birth takes form in the womb, a a cocoon, the ocean depths or the night sky. When the mentor or coach in you embraces the essence of Night, personal growth occurs through dream fulfilllment, and you become a powerful source for human evolution.

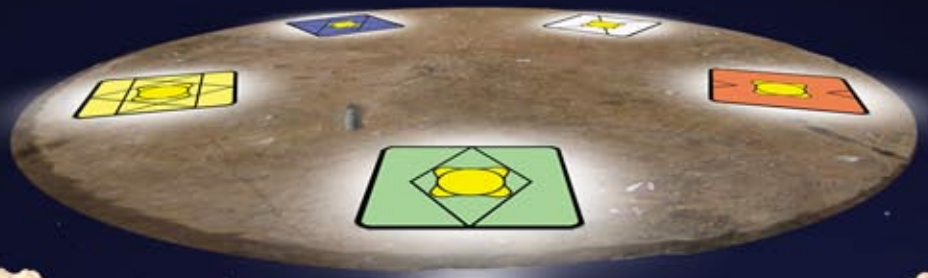


Your Storm capacity to transform life is challenged by Moon to be gentle and fluid rather than cathartic or tempestuous. When you embrace the stream of empathy carried by Moon, floods surrender to flow, and your generation of change is grounded in softness and empathy - through touching the hearts of others. Then stormy, potentially explosive skies, can dissolve into rivers of new possibilities. Moon reminds you of the Law of Process and that one step at a time is often the most effective way to create meaningful and lasting change.



As storm you are the essence of change and transformation - All things are in constant change and the only thing that is predictable in the universe is change. Sun reminds you that you can only go forwards or backwards - shrink or evolve. Which way depends on how you perceive the change. Sun lights up the path of change. The dance with Sun is the guarantee that change will be light and enlightened, fuelled with the Source of all intelligence and life. The support of Sun ensures growth for the highest evolutionary good of all.

When Storm meets Wind, change is inspired, animated and implemented through communication; Catharsis is balanced and channelled though spiritual intent. Management of change invokes Higher Truth to become leadership for transformation and self-mastery. The power of the dance between Storm and Wind can be seen in rebirthing or pranha yoga where breath facilitates transformation. When you dance with Wind, the change you bring is communicated to awaken your fellow beings, for the highest good of all.



As Sun your gift is to generate enlightenment, lightness, and light, in a far-reaching way. By embracing Dog's challenge of love - the creative power of the universe - enlightenment can be sustainable and touch all. Dog shows you that you need not blaze a trail or raze the status quo to the ground to generate the new, but that you can communicate and empower through lightness, softness and warmth, Sun's gentler qualities. When you surrender to the 'heart-centredness' of Dog, your power as Sun becomes a loving womb of life, and a force for evolution and growth.

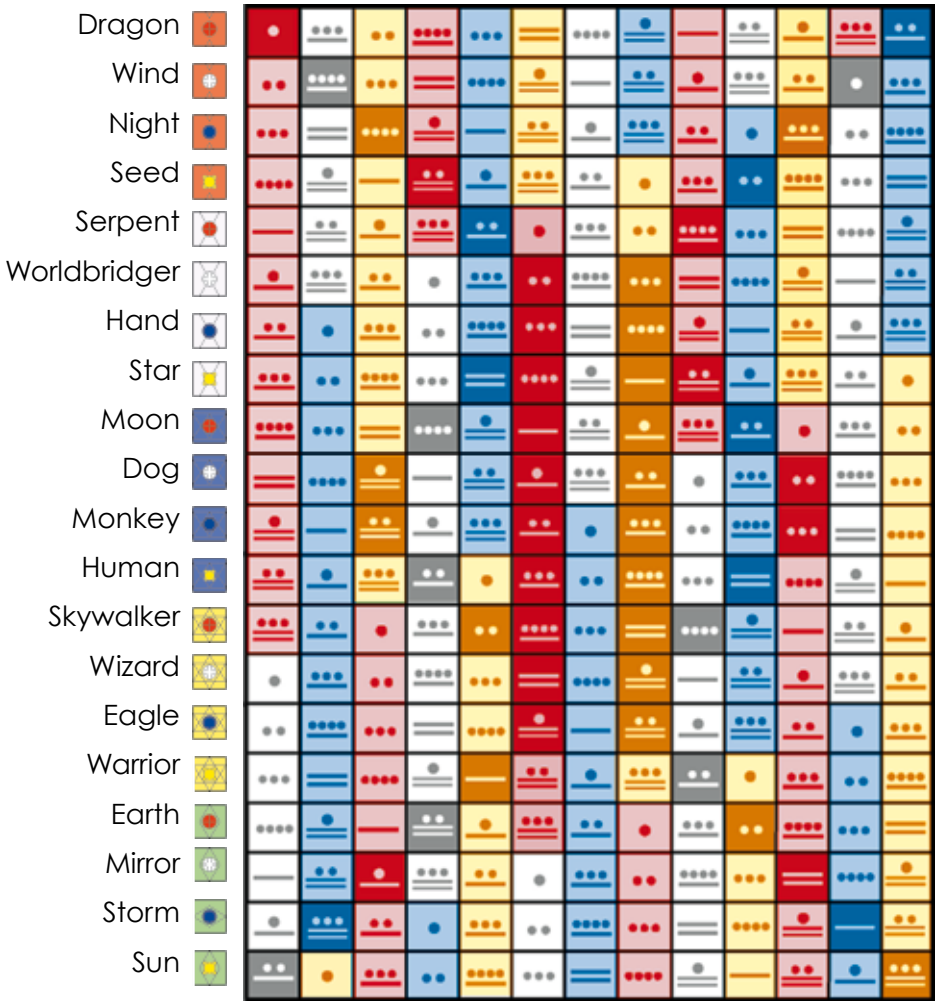
As Sun you are the animating and regenerative source of energy and consciousness. By causing eternal change, Storm supports you to be constantly creative, so that your power to create and generate always has a channel for expression. Storm assists you by acting as a catalyst and 'step down transformer'. This ensures that your gift of re-generating wholeness and oneness is accessible for the sustenance of all life and human growth. Sun holds a light to the grandest idea of who we can become. Only through transformation and change will this be achieved.

Sun - universal consciousness meets with Dragon - individualized consciousness, to know itself. Sun, 'everything and nothing', meets with Dragon, 'something in the making'. Nature dances with nurture, anti-matter with matter, the Unmoved with the mover. To fulfilll itself, the All requires the one; the fullness of potential invokes the germ of purpose; The

Womb of creation unfolds into the gift of Birth. Beyond the outer limits, is a new start, beyond omega is a new alpha. The end is the beginning...

TABLE 17: **Wavespell, or Life-Wave**

TZOLKIN



WAVESPELL OR LIFE WAVE

While your Tone, Seal, and the Seal relationships tell you who you are and how to bring out the best in yourself, the wavespell gives you what your greater purpose is. It's like the nature of 'the wave that you surf' in life. You do not necessarily need to 'do' anything about this greater purpose – about making the wave happen. Simply by going with the flow, and by, for example, embracing the above guidelines, your purpose fulfils itself in the background. You cannot stop the wave, make the wave happen, or change the wave. But by surfing it, you re-affirm its presence, its meaning, it's purpose and its power. By being the fit and supple surfer, you allow the wave to fulfil itself.

To discover the Life-Wave of Steven and Diana, refer to TABLE 17. Here the Tzolkin is shown as 20 Wavespells. A Life-wave or Wave is a run of 13 days. the nature of the Seal at Tone 1 determines the nature of the wave. For example, all 13 days running from 1 Dragon to *13 Skywalker*, are in the *Dragon Wave*. As Dragon is a red sign (internal colour), the Dragon Wave is a red one. Princess Diana was 9 *Storm*. You will notice 9 *Storm* is in the Blue, *Monkey Wave*. Tone 1, 5, 9 and 13 of any Wave will always relate to seals that have the same colour as each other - the colour of the Wave itself.

A Cameo

I love playing with this material. There is just so much that opens up when you get into the fun of it. For example, I'm fascinated by the aptness of Elton John's dedication To Princess Diana. Presumably he didn't know much about Mayan Cosmology, yet the song "Candle in the wind" sums up the chart of Lady Di to a 'T'!

The candle could represent the light or enlightenment of *Sun*, her Support Partner. "…the Wind was of course the communication of spirit, her Discovery Partner, represented by the sign of *Wind*. The legend that never burned out, could refer to her guiding vision – *Eagle*, combined with her greater magical purpose represented by the Monkey wavespell. "When the rain set in" might refer to the two major aspects of water in Mayan cosmology, *Storm* and *Moon* - both in her chart: Storm – catalytic, tidal, bursting change; and Moon – fluid, flexible flow, like the river of compassion, the softness of tears. The Wind of spirit kept the candle dancing, yet there needed to be a balance between the two forces of water – the Sparring Partners - so that the candle could stay alight.
